About

I'm a **full stack developer and AI developer** based in Cebu, Philippines, working with clients across Europe, Asia, New Zealand, and the United States. When you partner with me you get **one dedicated point of contact** who takes your project from first idea to launch day, then sticks around to help you grow.

My career has been spent where websites meet real customers: shipping features and **critical fixes** for one of Asia's largest online learning platforms, keeping **online stores** selling for French jewellery brands, and delivering **agency-standard work** for New Zealand businesses at Plato Creative.

I'm equally at home in **legacy and modern codebases**, from PHP, jQuery, and WordPress through to React, Next.js, and Astro. Plenty of businesses run on a mix of both, and I enjoy meeting a codebase where it is: maintaining it, improving it, or migrating it when the time comes.

I work **AI-native**. **Agentic AI** is part of my daily stack: I orchestrate Claude Code, Cursor, and GitHub Copilot across real client work, and at Plato I build the **AI solutions** behind the web team, from Claude Code agent skills that automate maintenance and site builds to **Model Context Protocol (MCP)** integrations that connect AI agents to Craft CMS, Storyblok, and Statamic. Every AI-assisted change still gets human review, so projects move faster without cutting corners.

Based in	Cebu City, Philippines
Working with	Clients across Europe, Asia, New Zealand, and the United States
Focus	Full-stack builds, agentic AI, AI-powered workflows, and ongoing care
Available for	New projects, retainers, and white-label agency work

School website · 2026 **Launched** Plato Creative

Lindisfarne College website

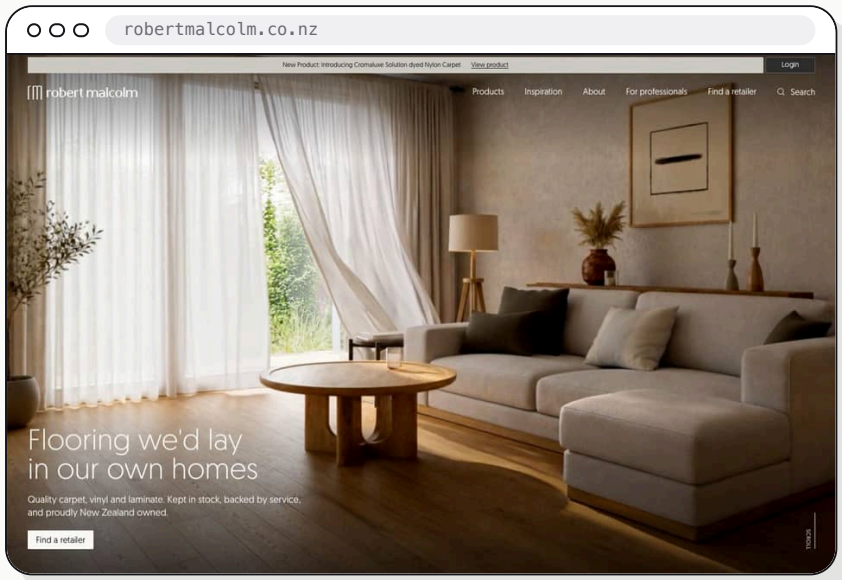

A full website build for Lindisfarne College on Astro and Storyblok, from setup through launch QA.

Lindisfarne College is a day and boarding school for boys in Hastings, Hawke's Bay. The website introduces the school to prospective families and covers enrolment, sport, and school life, with an events calendar and a news section, all managed through Storyblok.

I built the site's front end from Plato's Astro and Storyblok starter kit: the header, footer, and home page, a full library of content blocks, pre-enrolment and contact forms, an events calendar, and a sport options table. I also set up analytics tracking, the sitemap and SEO metadata, and worked through QA and client feedback rounds to get the site ready for launch.

Astro · Storyblok · TypeScript · Tailwind CSS · React

Client Lindisfarne College · **Services** Web development, CMS development, Front-end development · `lindisfarne.school.nz`

Flooring supplier website · 2026 **Launched** Plato Creative with Plato's senior developer

Robert Malcolm website

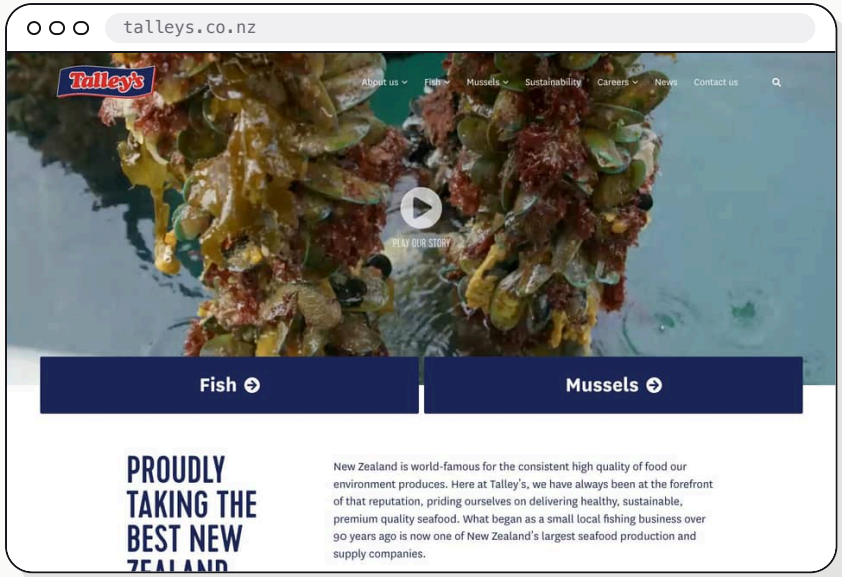

A new website for Robert Malcolm, a New Zealand-owned carpet, vinyl, and laminate supplier since 1884, built on Statamic.

Robert Malcolm has supplied carpet, vinyl, laminate, and luxury vinyl flooring to New Zealand since 1884. The site presents the range and inspiration for homeowners, resources for flooring professionals, and a retailer finder.

I launched the site at Plato Creative with Plato's senior developer, building it on Statamic.

Statamic · Laravel · PHP

Client Robert Malcolm · **Services** Web development, CMS development · `robertmalcolm.co.nz`

Food company website · 2026 **Launched** Plato Creative

Talley's website

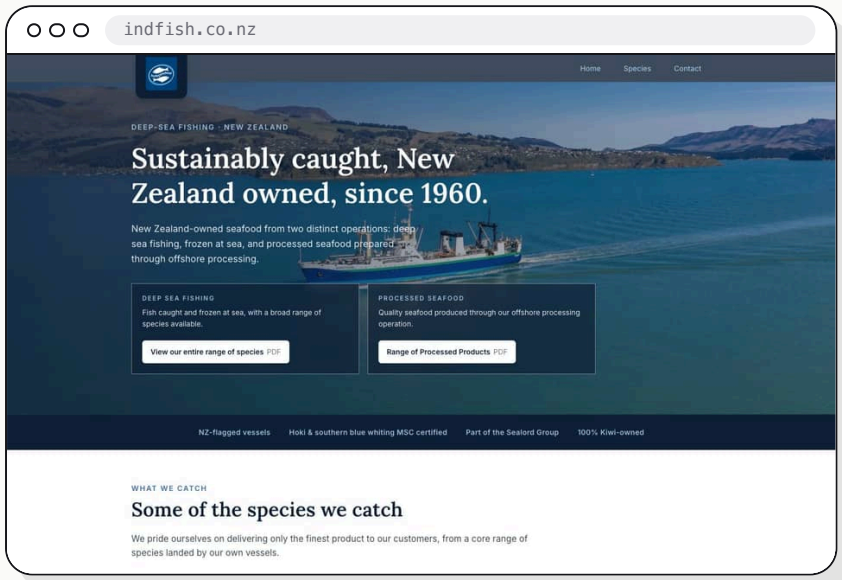

A new website for Talley's, a family-owned New Zealand food company, built with Astro and Storyblok.

Talley's is a family-owned New Zealand food company with seafood, vegetable, dairy, and meat divisions supplying customers worldwide. The site tells the company's story and introduces its divisions and brands.

I launched the site at Plato Creative, built with Astro and Storyblok and deployed on Netlify.

Astro · Storyblok · Netlify

Client Talley's · **Services** Web development, CMS development · `talleys.co.nz`

Seafood supplier website · 2026 **Launched** Plato Creative

Independent Fisheries website

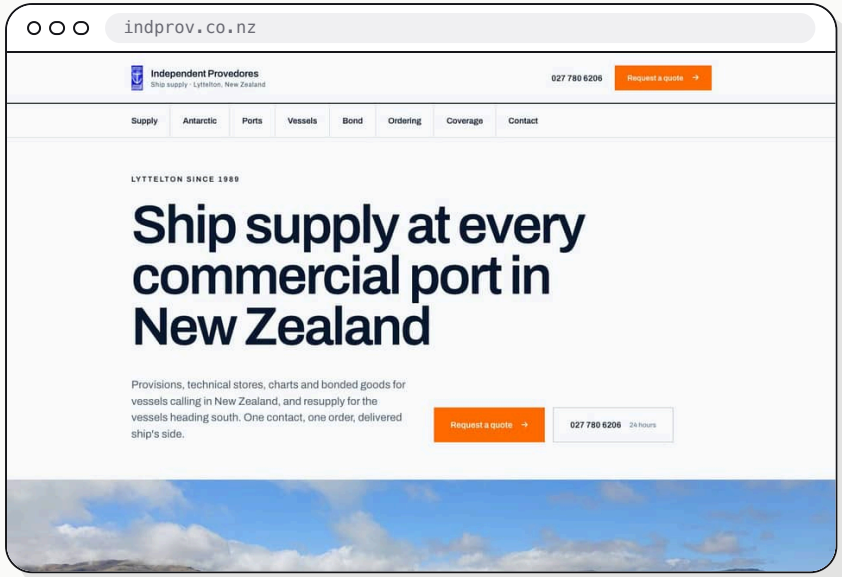

A new website for Independent Fisheries, a New Zealand deep-sea fishing company and seafood supplier since 1960, built with Astro.

Independent Fisheries is a New Zealand seafood supplier, deep-sea fishing since 1960. It catches hoki, southern blue whiting, and squid, frozen at sea, and supplies commercial customers.

I launched the site at Plato Creative, built with Astro and deployed on Netlify.

Astro · Netlify

Client Independent Fisheries · **Services** Web development · `indfish.co.nz`

Ship chandler website · 2026 **Launched** Plato Creative

Independent Provedores website

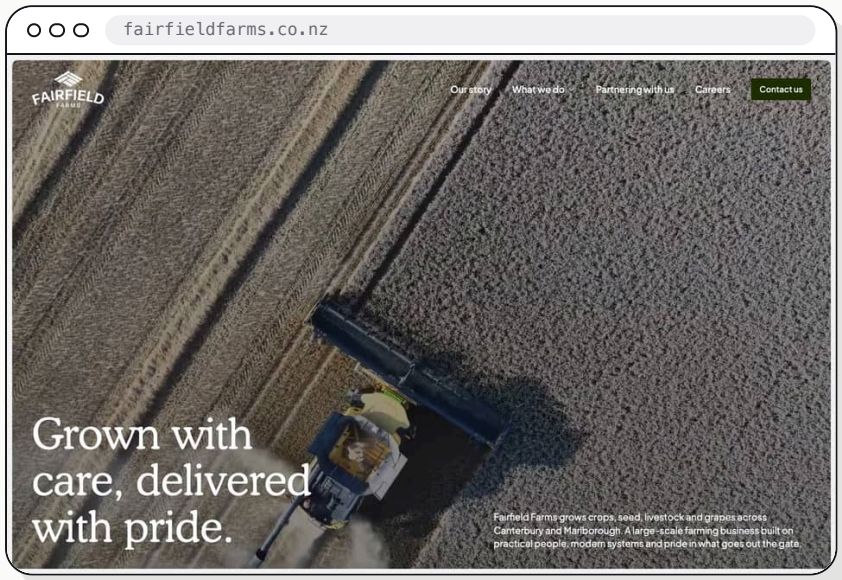

A new website for Independent Provedores, a Lyttelton ship chandler supplying vessels at New Zealand ports since 1989, built in vanilla HTML on Cloudflare.

Independent Provedores is a Lyttelton ship chandler, operating since 1989. It supplies provisions, technical stores, charts, and bonded stores to vessels at ten New Zealand ports, plus Antarctic resupply, and answers around the clock.

I launched the site at Plato Creative as a lightweight vanilla HTML, CSS, and JavaScript build hosted on Cloudflare.

HTML CSS JavaScript Cloudflare

Client Independent Provedores · **Services** Web development · `indprov.co.nz`

Farming business website · 2026 **Launched** Plato Creative

Fairfield Farms website

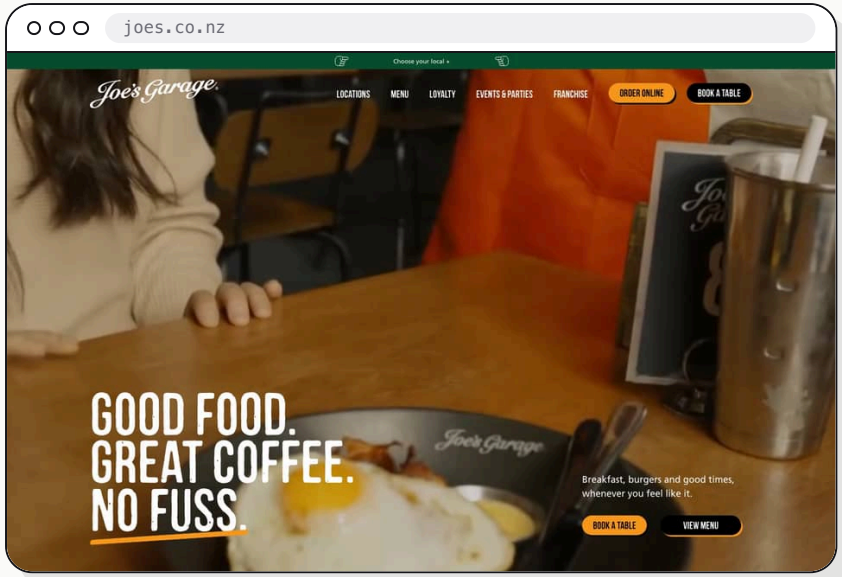

A new brand website for Fairfield Farms, a family-owned farming business in Canterbury and Marlborough, New Zealand, built with Astro and Storyblok.

Fairfield Farms is a family-owned New Zealand farming business growing vegetables, grain, seed, wine grapes, lamb, and beef across 12 properties in Canterbury and Marlborough. The site introduces the farm and what it grows, explains its land partnerships for landowners, and includes a careers section where people can browse open roles and apply directly.

I launched the site at Plato Creative, built on Plato's Astro and Storyblok starter and deployed on Netlify. I developed the content blocks, the careers section with listings and application forms, custom typography, brand pattern animations, and Formspree form handling with reCAPTCHA, then worked through mobile and design QA rounds before launch.

Astro Storyblok Tailwind CSS TypeScript Netlify

Client Fairfield Farms · **Services** Web development, Front-end development, CMS development · `fairfieldfarms.co.nz`

Hospitality website · 2026 **Launched** Plato Creative with Plato's senior developer

Joe's Garage website

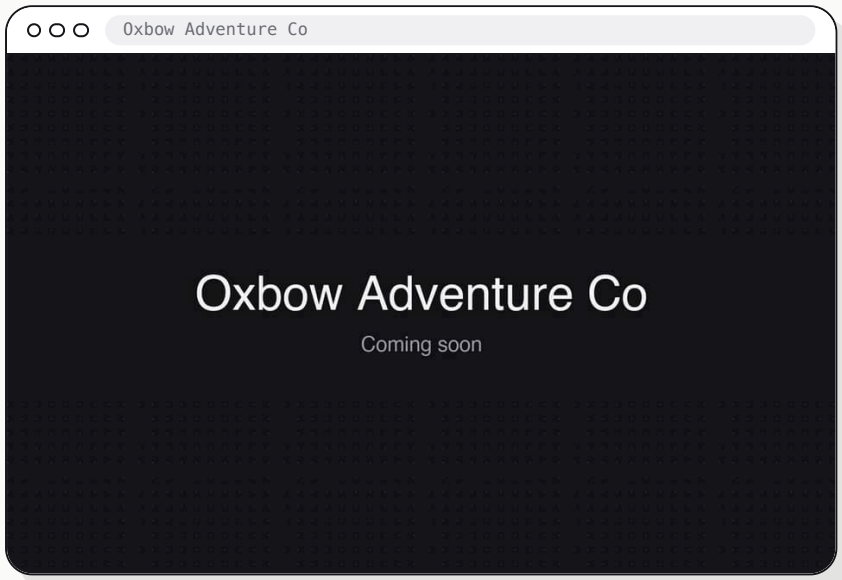

Front-end development for the rebuilt Joe's Garage website, plus maintenance on the previous site.

Joe's Garage is a New Zealand cafe and bar chain that started in Queenstown and now runs locations across the country. The website handles menus, table bookings, online ordering, and a loyalty programme for every location, so it has to stay quick and easy to use for hungry customers on their phones.

I worked on the site rebuild as part of the Plato development team, building the location landing and individual location pages, the loyalty page with its sign-up drawer, and reusable content blocks like accordions, carousels, contact forms, and embeds. I also maintained the previous Craft CMS site while the rebuild was underway, adding a new table booking widget and fixing issues on the careers page.

Astro · Storyblok · Tailwind CSS · TypeScript · Craft CMS

Client Joe's Garage · **Services** Web development, Front-end development, Maintenance · joes.co.nz

Adventure park website · 2026 Coming soon Plato Creative

Oxbow Adventure Co website

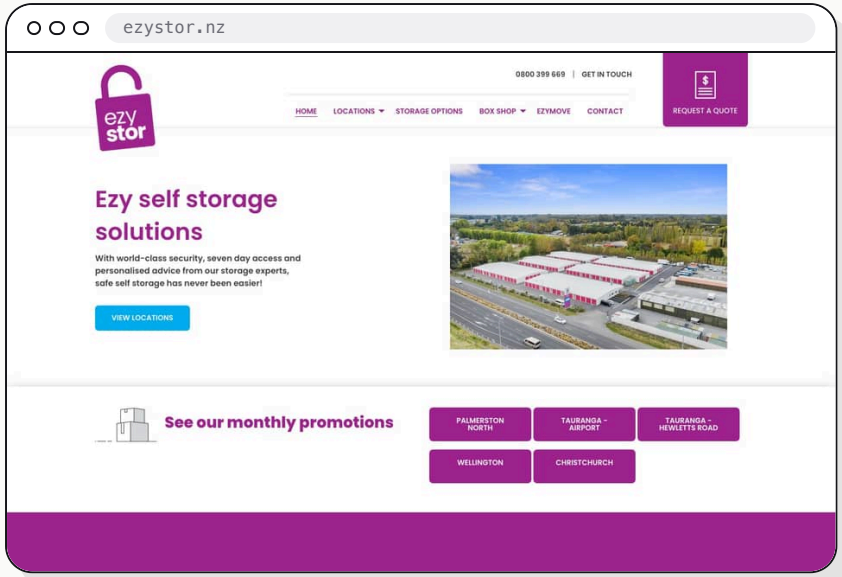

A new website for Oxbow Adventure Co, a private adventure park near Queenstown, built on Statamic. Launching soon.

Oxbow Adventure Co runs a private adventure park in the Gibbston Valley, 30 minutes from Queenstown, with jet sprint boats, a cliff-climbing 4WD, and a clay target range.

I'm building the new site at Plato Creative on Statamic, hosted on SiteHost. It launches soon.

Statamic · Laravel · PHP · SiteHost

Client Oxbow Adventure Co · **Services** Web development, CMS development

Self-storage company website · 2026 Maintained Plato Creative

EzyStor website

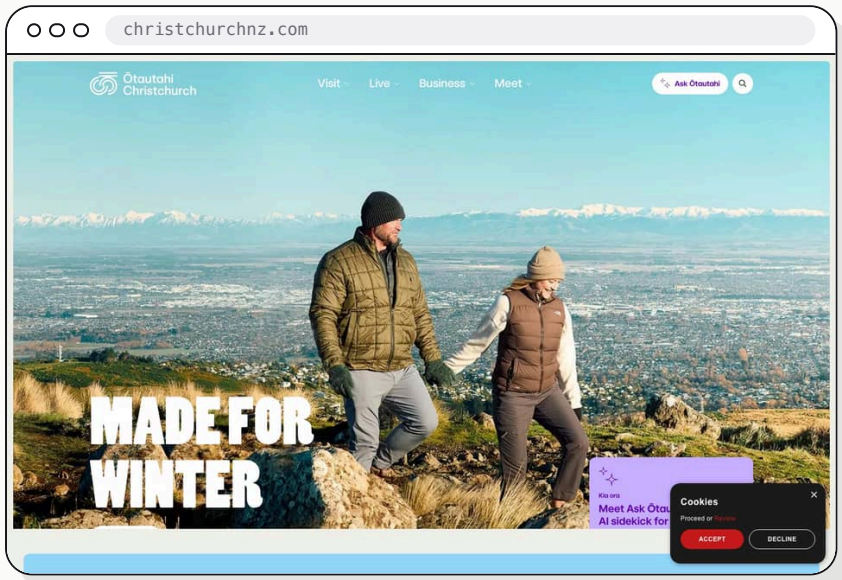

A ground-up rebuild of the website for EzyStor, a nationwide New Zealand self-storage company.

EzyStor is a New Zealand self-storage company, founded in 2004 and headquartered in Christchurch, with facilities around the country including Christchurch, Palmerston North, and Tauranga. Customers use the site to find a nearby facility, compare unit sizes, and get in touch for a quote.

I set up the new site on Statamic and Laravel and I'm building it out from the designer's static pages: the EzyStor theme, fonts, and type scale, a library of reusable page sections, and the interactive front end, with fully CMS-editable content as the next phase.

Statamic CMS · Laravel · PHP · Tailwind CSS · Alpine.js

Client EzyStor · **Services** Web development, CMS development, Front-end development · ezystor.nz

Tourism and city promotion website · 2026 Maintained Plato Creative

ChristchurchNZ website

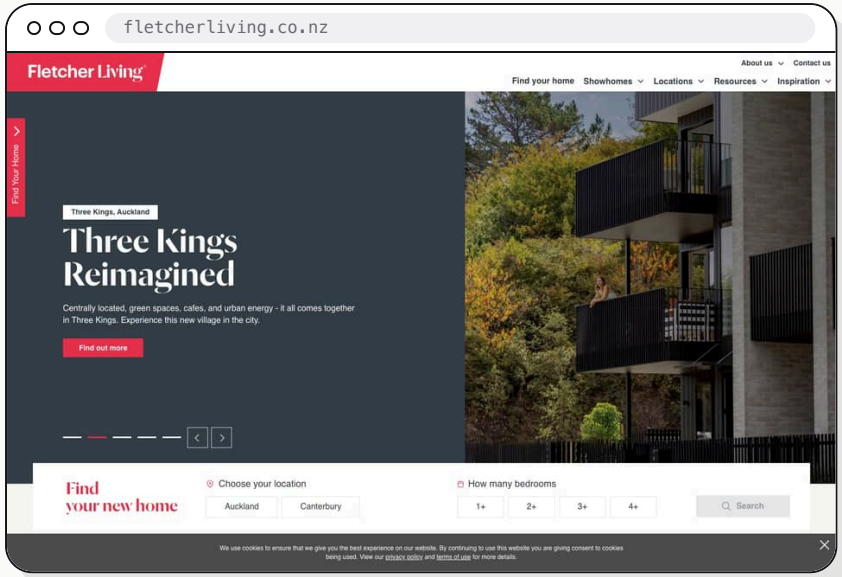

Feature development and fixes for the official visitor website of Christchurch, New Zealand.

ChristchurchNZ is the agency that promotes Christchurch and drives the city's economic development. Its website, christchurchnz.com, is the official guide for visitors and locals, covering things to do, places to eat and drink, events, and trip planning across the city and wider Canterbury.

I work on the site as part of the Plato development team. I built the food and drink venue section, including venue pages, a filterable venue directory backed by its own API endpoints, and a venue carousel content block, and I handle smaller fixes and improvements across listings and carousels.

Astro · Storyblok · React · Tailwind CSS · Algolia

Client ChristchurchNZ · **Services** Web development, Feature development, Bug fixes and support · christchurchnz.com

Property developer website · 2026 Maintained Plato Creative

Fletcher Living website

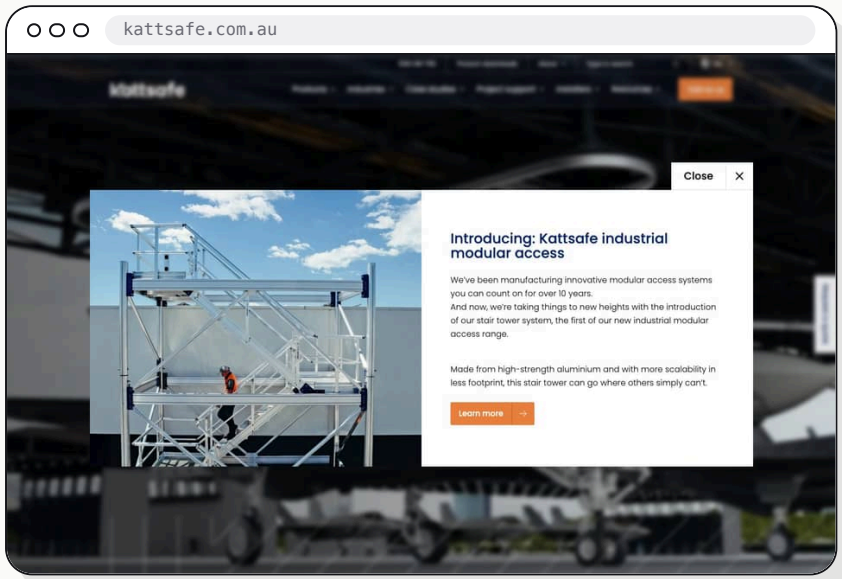

Feature development and maintenance for the home listings website of one of New Zealand's largest residential builders.

Fletcher Living is the residential arm of Fletcher Building, one of New Zealand's largest construction companies. Its website is where buyers browse developments, house listings, and showhomes across the country, so accurate property data and a smooth browsing experience matter on every page.

I work on the site as part of the Plato development team. I built a new carousel content block that editors manage through the CMS, with a SilverStripe element on the back end and a Vue component on the front end. I also fixed the VaultRe integration that keeps property listings and images in sync, sorted showhome display issues, and handled UI fixes and software updates to keep the site stable.

SilverStripe CMS · PHP · Vue.js · SCSS · MySQL

Client Fletcher Living · **Services** Web development, Feature development, Maintenance · fletcherliving.co.nz

Height safety manufacturer website · 2026 Maintained Plato Creative

Kattsafe website

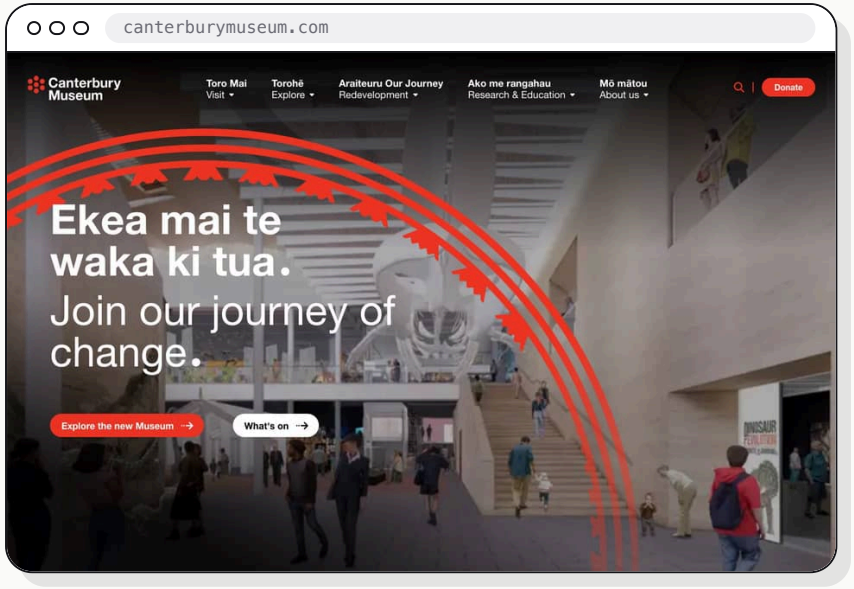

Feature development and maintenance on the multi-region website of an Australian height safety manufacturer.

Kattsafe, formerly Sayfa Group, designs and manufactures height access and fall protection systems: guardrails, walkways, ladders, and roof access equipment. Its website runs Australian and US sites from a single Next.js codebase backed by Storyblok, with a deep product catalogue that engineers and installers rely on for specifications and downloads.

I worked on the product side of the site as part of the Plato development team. I built a copy-to-clipboard feature for product specifications so specifiers can drop accurate product details straight into their documents, added a new form layout, improved how the site middleware handles ad tracking parameters, and fixed spacing, alignment, and content issues across product pages.

Next.js · React · Storyblok · Tailwind CSS · Storybook

Client Kattsafe · **Services** Feature development, Front-end development, Maintenance · kattsafe.com.au

Museum website · 2026 Maintained Plato Creative

Canterbury Museum website

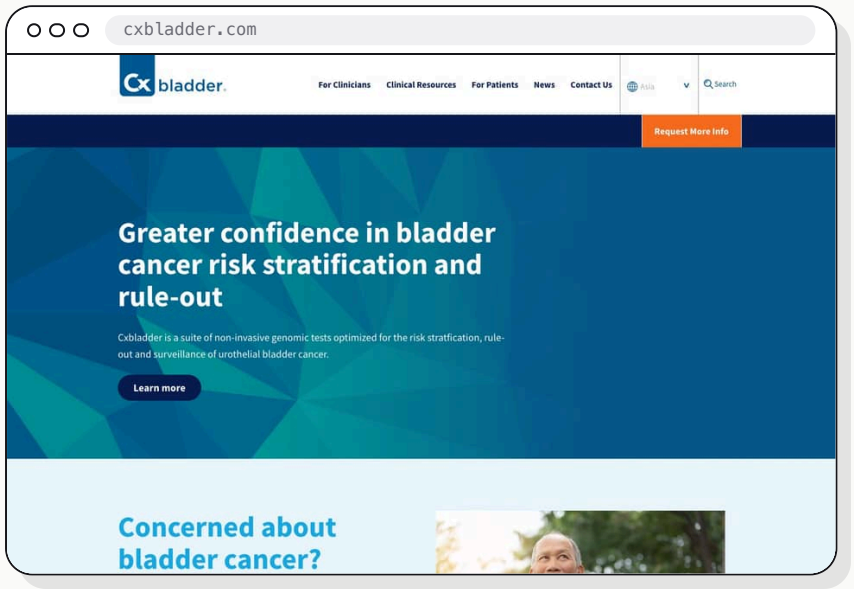

Feature development and maintenance for Canterbury Museum's headless Craft CMS and Next.js website.

Canterbury Museum is one of New Zealand's oldest museums, based in Christchurch and home to millions of objects and taonga. Its website runs on a headless stack, with Craft CMS managing content and a Next.js frontend serving visitors information about exhibitions, events, and the museum's major redevelopment.

I work across the Next.js frontend and the Craft CMS backend as part of the Plato development team. I built the newsletter subscription feature, added a full-size image pop-up to content blocks, reworked the homepage banner, and ran a maintenance pass covering CMS and plugin updates along with local development tooling.

Craft CMS · Next.js · React · Tailwind CSS · PHP

Client Canterbury Museum · **Services** Web development, Feature development, Maintenance · canterburymuseum.com

Health diagnostics website · 2026 Maintained Plato Creative

Cxbladder website

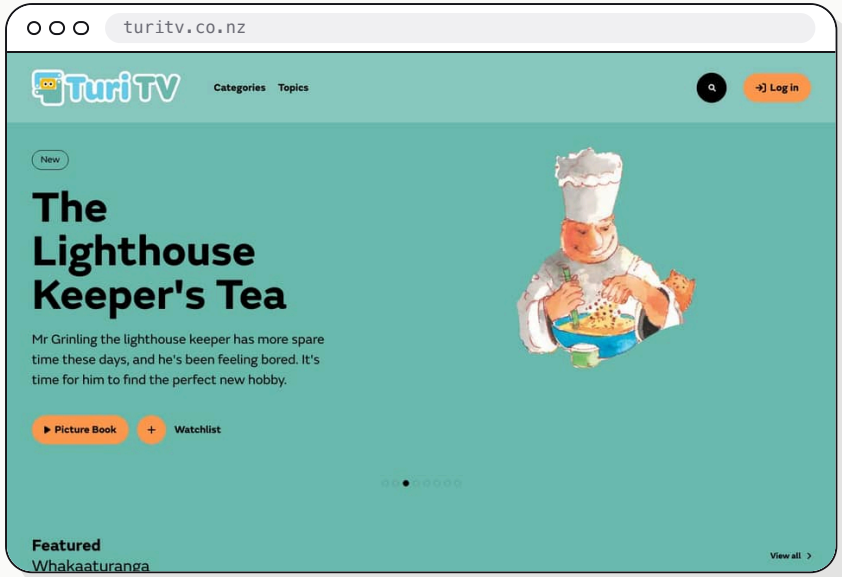

Multi-region locale rollout and front-end maintenance for a bladder cancer diagnostics site.

Cxbladder is a suite of non-invasive urine tests for detecting and managing bladder cancer, developed by Pacific Edge, a New Zealand cancer diagnostics company. The site serves clinicians and patients across New Zealand, the United States and other regions, with separate content for each locale.

I added an Australian locale to the multi-region SilverStripe site, built a task to duplicate existing content into the new locale, and set up the redirects, noindex tags and crawl rules needed to stage it safely. I also fixed a run of front-end issues across the header, navigation dropdowns and responsive layout as part of the Plato development team.

SilverStripe CMS · PHP · MySQL · jQuery

Client Pacific Edge (Cxbladder) · **Services** Web development, Feature development, Maintenance · cxbladder.com

Video streaming platform · 2026 Maintained Plato Creative

TuriTV website

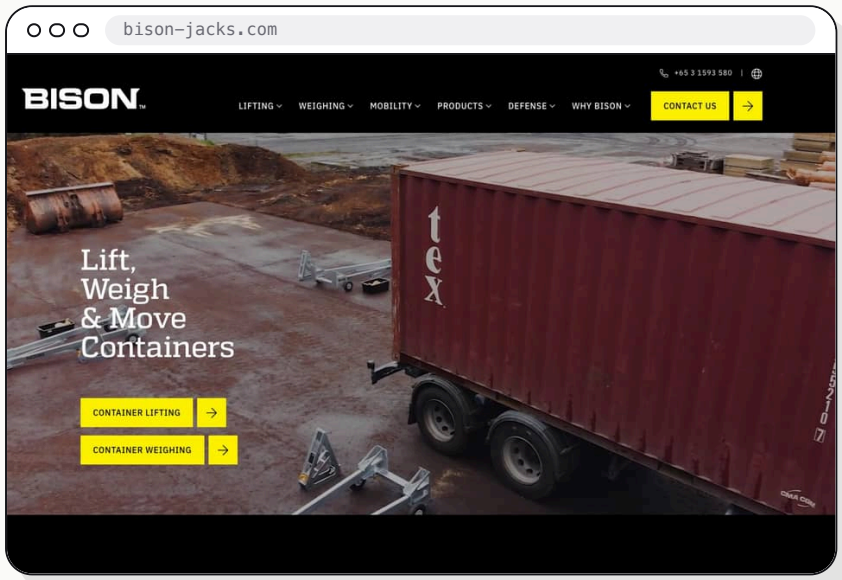

Maintenance and platform upgrades for a New Zealand on-demand video platform serving the Deaf community.

TuriTV is an on-demand video platform for New Zealand's Deaf community, streaming shows and stories in New Zealand Sign Language. The site runs as a headless build: a Craft CMS backend serves content over GraphQL to a Next.js frontend, and viewers can register an account and save videos to a personal watchlist.

I look after the platform as part of the Plato development team. I upgraded the CMS from Craft 4 to 5, updated dependencies across the backend and frontend, fixed bugs in the watchlist and user account features, set up new reCAPTCHA keys for the contact form, and resolved CORS and server configuration issues between the CMS and the frontend.

Craft CMS · Next.js · React · GraphQL · Tailwind CSS

Client TuriTV · **Services** Maintenance, Bug fixes and support, Web development · `turitv.co.nz`

Industrial equipment manufacturer website · 2026 Maintained Plato Creative

BISON website

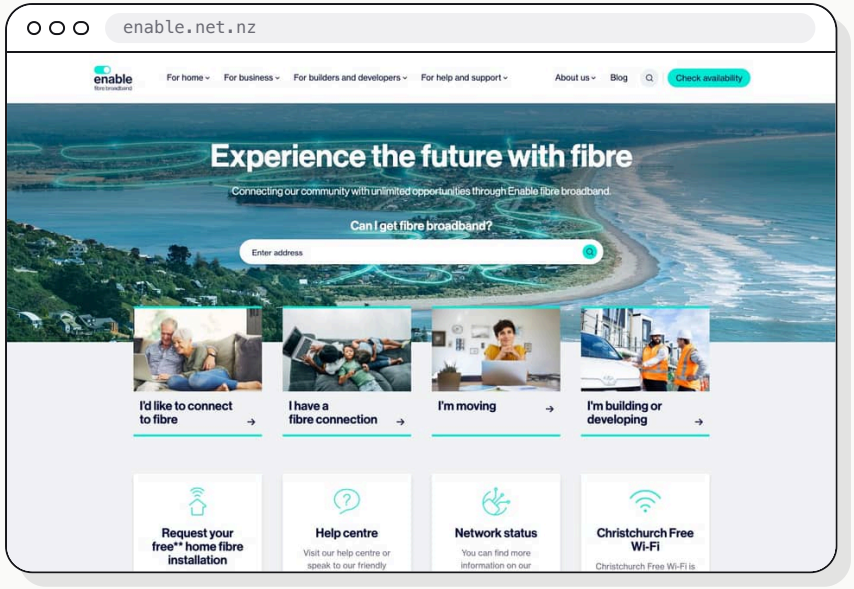

Feature development and maintenance for the website of BISON, a New Zealand container-handling equipment company.

BISON is a New Zealand company that designs and builds container weighing and lifting equipment for freight and logistics operators around the world. Its website runs on Craft CMS and serves as the main channel for product information and sales enquiries, so the contact and quote forms carry real commercial weight.

I built a new custom contact form for the site, replacing the embedded third-party forms with a Freeform block integrated into the Craft templates, and refined its validation, styling, and submission handling over several releases. I also added an enter-to-submit enhancement, fixed a recurring service unavailable error caused by image transforms running during page loads, and handled smaller template and styling fixes as part of the Plato development team.

Craft CMS · PHP · Tailwind CSS · Vue.js · SCSS

Client BISON Group · **Services** Web development, Feature development, Maintenance · `bison-jacks.com`

Fibre broadband provider website · 2026 Maintained Plato Creative

Enable Networks website

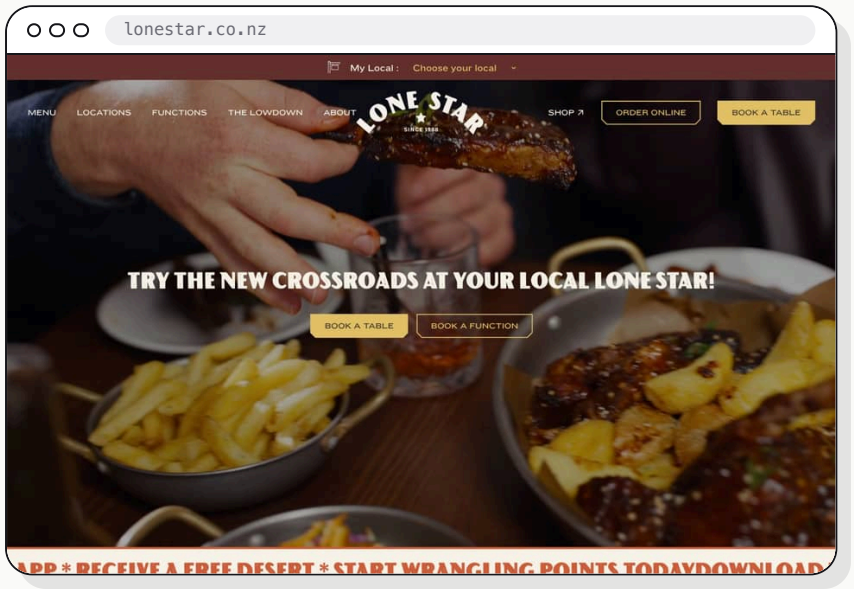

Feature development and maintenance for the consumer website of Christchurch's fibre broadband network.

Enable Networks builds and operates the fibre broadband network across greater Christchurch, connecting homes and businesses through local internet providers. Its consumer website is where residents check whether fibre is available at their address, compare providers, and get help with their connection.

I work on the site as part of the Plato development team. I built a new page from designs using SilverStripe content blocks and React components, fixed component mounting and layout issues from client revisions, added HubSpot tracking, improved the local development setup, and kept CMS plugins up to date.

SilverStripe CMS · PHP · React · TypeScript · Tailwind CSS

Client Enable Networks · **Services** Web development, Feature development, Maintenance · `enable.net.nz`

Restaurant chain website · 2026 Maintained Plato Creative

Lone Star website

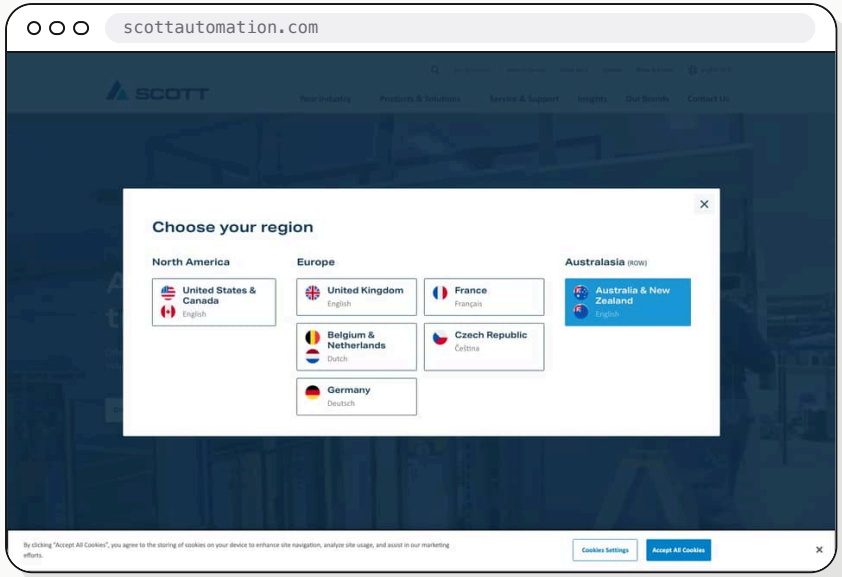

Feature development and maintenance for one of New Zealand's best-known restaurant chains.

Lone Star is a Texas-themed restaurant and bar chain that started in Christchurch and now has locations across New Zealand. The website handles menus, locations, table bookings, functions enquiries, and careers, built as a fast static site with content managed in Storyblok.

I work on front-end features and maintenance as part of the Plato development team: rolling out a site-wide brand typography update across every page type, moving the table booking widgets over to the ResHub reservations platform, improving the functions enquiry form, and updating home page banner components.

Astro · Storyblok CMS · React · Tailwind CSS · Netlify

Client Lone Star · **Services** Front-end development, Feature development, Maintenance · `lonestar.co.nz`

Industrial automation company website · 2026 Maintained Plato Creative

Scott Automation website

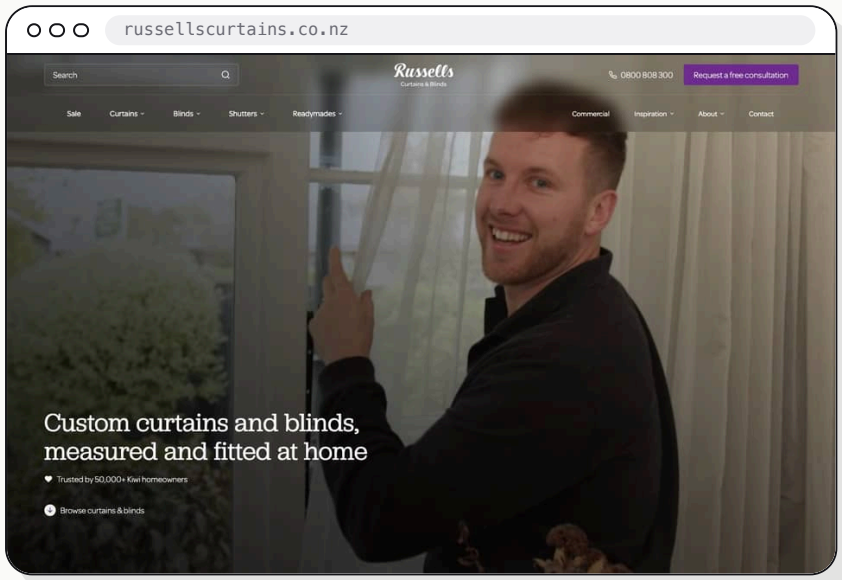

Maintenance and multi-region updates for the global website of Scott, a New Zealand founded automation and robotics company.

Scott designs and builds automation and robotics systems for industries like food processing, mining, and materials handling, from its home in Dunedin, New Zealand, to operations around the world. Its website runs on Craft CMS and serves localised regional sites for global, US, and European audiences in several languages.

I help maintain the site as part of the Plato development team: keeping Craft and its plugins up to date, fixing caching issues, improving the local development setup, and extending the language switcher, including adding the Belgian regional site with its own flag and label.

Craft CMS PHP Tailwind CSS Vue.js SCSS

Client Scott Automation · **Services** Web development, Maintenance, Bug fixes and support · `scottautomation.com`

Curtain and blind retailer website · 2026 Maintained Plato Creative

Russells Curtains and Blinds website

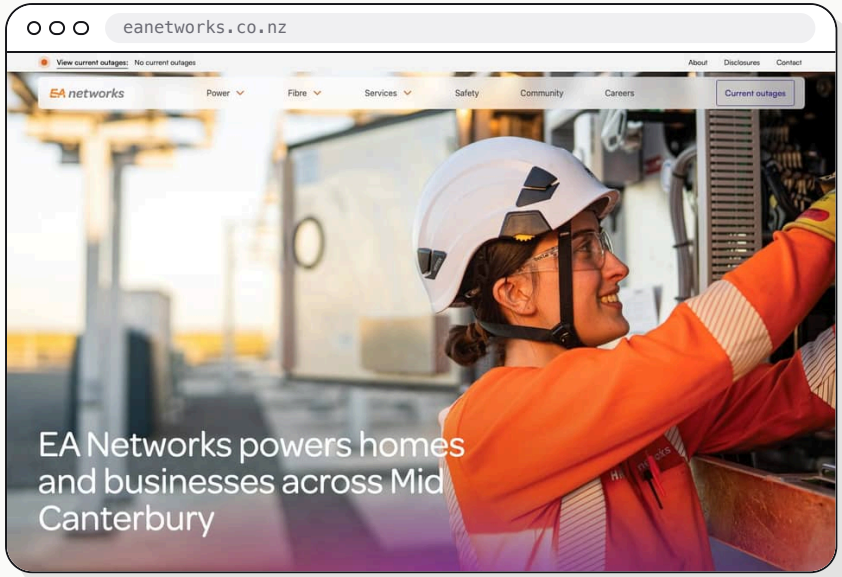

Maintenance and ongoing development for New Zealand curtain and blind specialist Russells.

Russells is a New Zealand curtain and blind specialist, making custom window furnishings for homes across the country. The site pairs a headless Craft CMS backend with a Next.js frontend and pulls product data from Shopify, so customers can browse ranges, book consultations, and get price estimates online.

I maintain the site as part of the Plato development team. Recent work includes updating Craft CMS and its plugins, fixing a missing product variants issue in the ready-made curtains range, refining the house pricing tool, and handling smaller requests like footer download links and redirects.

Craft CMS Next.js React Tailwind CSS Shopify

Client Russells · **Services** Web development, Maintenance, Bug fixes and support · `russellscurtains.co.nz`

Electricity network website · 2026 Maintained Plato Creative

EA Networks website

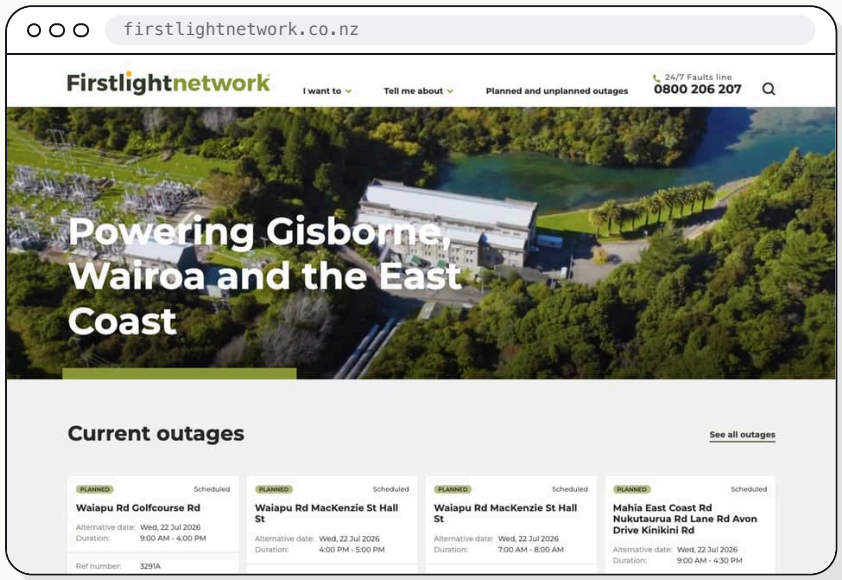

Maintenance and improvements for the website of EA Networks, Mid Canterbury's electricity and fibre network cooperative.

EA Networks is a community-owned cooperative that runs the electricity distribution and fibre networks for the Ashburton District in Mid Canterbury. Its website keeps customers informed with outage updates, fibre availability searches, and live load management status, all managed through Storyblok on a fast Astro front end.

I work on the site as part of the Plato development team, handling fixes and improvements. That includes building a helper that serves CMS images and downloads from EA Networks' own branded asset domain, and rebuilding the load management display that shows customers the current state of the network.

Astro Storyblok React TypeScript Tailwind CSS

Client EA Networks · **Services** Web development, Maintenance, Bug fixes and support · eanetworks.co.nz

Electricity network website · 2026 Maintained Plato Creative

Firstlight Network website

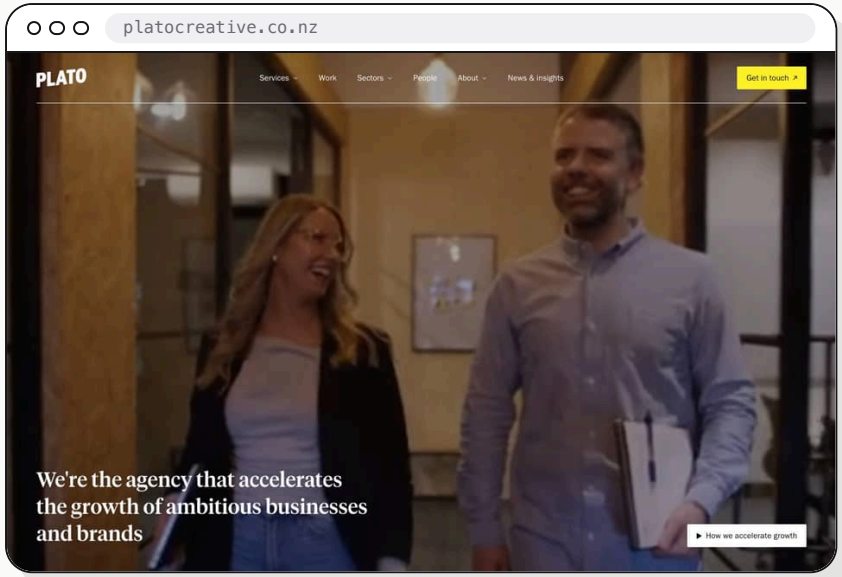

Maintenance and support for the electricity distribution network serving Tairāwhiti and Wairoa.

Firstlight Network, previously Eastland Network, owns and operates the electricity distribution network for the Tairāwhiti and Wairoa regions on New Zealand's East Coast. Its SilverStripe website keeps locals informed about power outages, new connections, and network services, so the information on it has to be accurate when the power goes out.

I maintain the site as part of the Plato development team. I fixed the live power outage listings so current outages display correctly and irrelevant entries are filtered out, added a CMS field for editors to manage the site's copyright text, and handled smaller content and configuration updates.

SilverStripe PHP SCSS jQuery Gulp

Client Firstlight Network · **Services** Web development, Maintenance, Bug fixes and support · firstlightnetwork.co.nz

Creative agency website · 2026 Maintained Plato Creative

Plato Creative website

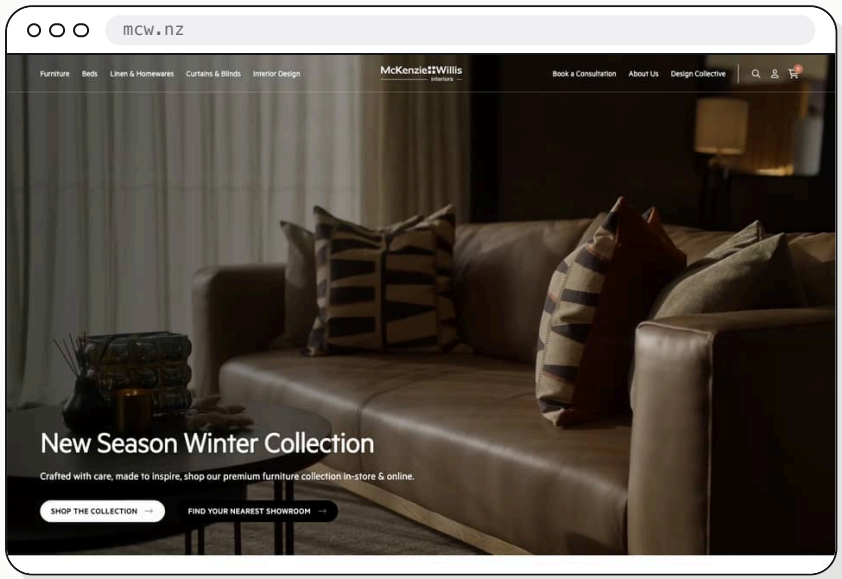

Front-end fixes and improvements for Plato Creative's own agency website.

Plato Creative is a full-service creative agency based in Christchurch, New Zealand, and this is the agency's own website. Built with Astro and Storyblok, the site leans on video to showcase the agency's work, people, and culture, so smooth playback and fast load times matter on every page.

I worked on front-end fixes and improvements as part of the development team: resolving video playback errors, tuning the streaming players for faster startup and lower memory use, smoothing out the careers and contact form experience after submission, and adding anchor links so people can share direct links to team members.

Astro · Storyblok · React · Tailwind CSS · TypeScript

Client Plato Creative · **Services** Front-end development, Maintenance, Bug fixes and support · `platocreative.co.nz`

Home furnishings e-commerce · 2026 Maintained Plato Creative

McKenzie & Willis online store

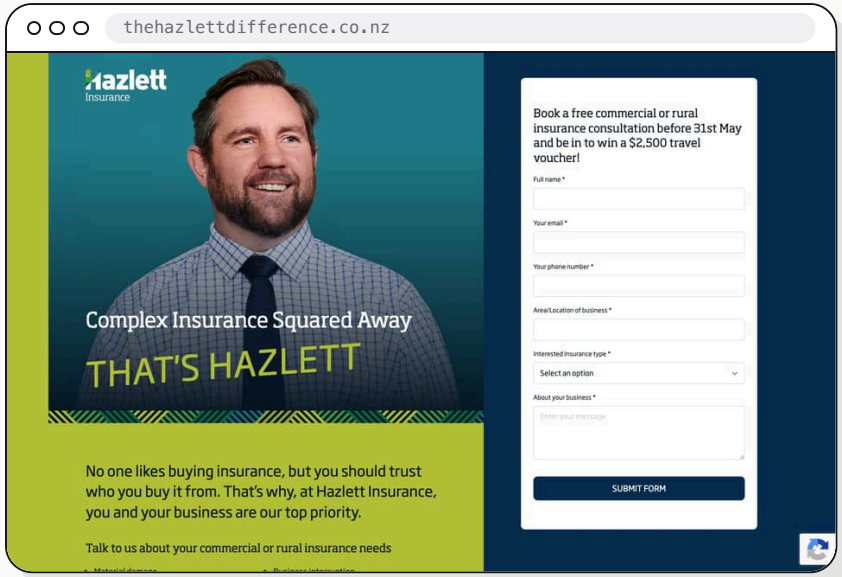

Front-end fixes and maintenance for the custom Shopify Hydrogen storefront of a long-established New Zealand furniture and interiors retailer.

McKenzie & Willis is a Christchurch retailer that has furnished New Zealand homes for over a century, selling furniture, beds, curtains, blinds and interior fabrics. Its online store is a custom Shopify storefront built with Hydrogen and React, with content managed in Storyblok and hosting on Shopify Oxygen.

I help maintain the storefront as part of the Plato development team. My work has focused on the customer enquiry forms: fixing how the embedded HubSpot form loads on the page and simplifying the consultation forms customers use to book design and curtain consultations.

Shopify Hydrogen · React · Remix · Storyblok CMS · Tailwind CSS

Client McKenzie & Willis · **Services** Front-end development, Maintenance, Bug fixes and support · `mcw.nz`

Insurance campaign landing page · 2026 Maintained Plato Creative

The Hazlett Difference campaign site

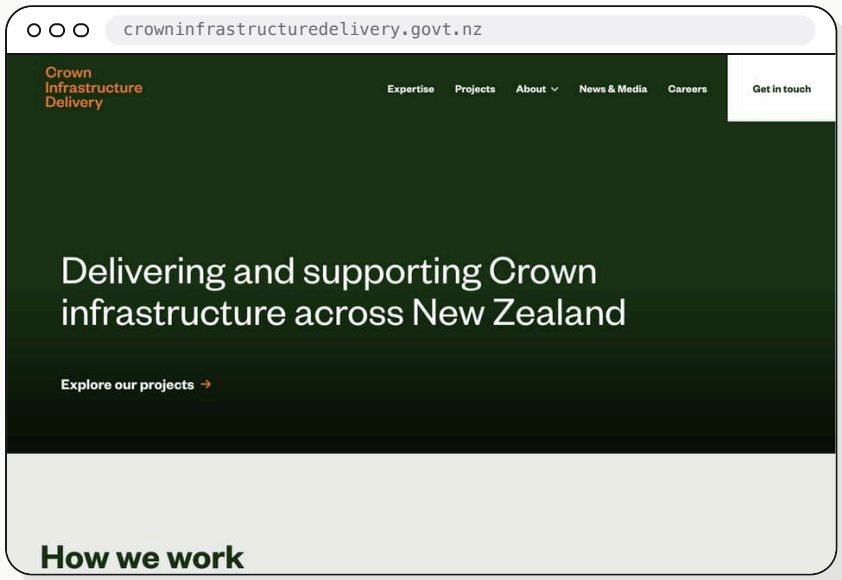

Content updates and tracking setup for Hazlett Insurance's campaign landing page.

Hazlett is a Christchurch-based rural services business, and Hazlett Insurance is its commercial and rural insurance arm, covering everything from material damage and liability to cyber risk and livestock. The Hazlett Difference is a campaign landing page built with Astro and Storyblok that introduces the insurance offering and drives enquiries through a contact form.

I looked after updates to the live campaign as part of the Plato development team: refreshing the main banner copy and imagery, adjusting the enquiry form and content blocks, and adding Google Tag Manager so the client could measure how the campaign performed.

Astro Storyblok Tailwind CSS React Netlify

Client Hazlett Insurance · **Services** Web development, Maintenance · `thehazlettdifference.co.nz`

Crown infrastructure company website · 2026 Maintained Plato Creative

Rau Paenga website

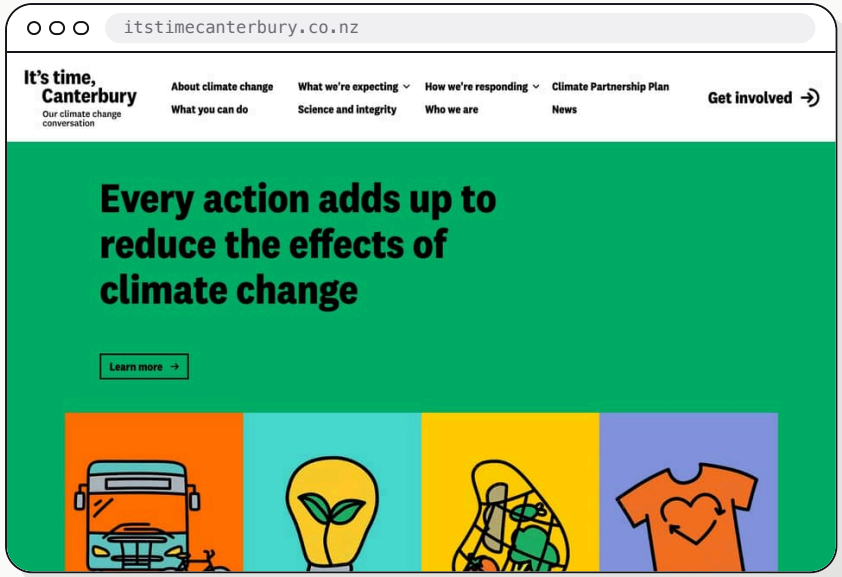

Maintenance and fixes for the website of New Zealand's Crown infrastructure delivery company.

Rau Paenga is the New Zealand Crown company that delivers major public infrastructure projects on behalf of government agencies. Its website presents the company and its project portfolio, and runs as a headless build with Craft CMS serving content to a Next.js front end. The company now operates as Crown Infrastructure Delivery.

I maintain the site as part of the Plato development team. I updated Craft CMS and its plugins, fixed a pagination bug on the projects listing where the page jumped to the top on every render and made the controls feel unresponsive, and set up the Docker-based local development environment the team uses to work on the site.

Craft CMS Next.js React Tailwind CSS PHP

Client Rau Paenga · **Services** Web development, Maintenance, Bug fixes and support · `crowninfrastructuredelivery.govt.nz`

Regional climate initiative website · 2026 Maintained Plato Creative

It's time, Canterbury website

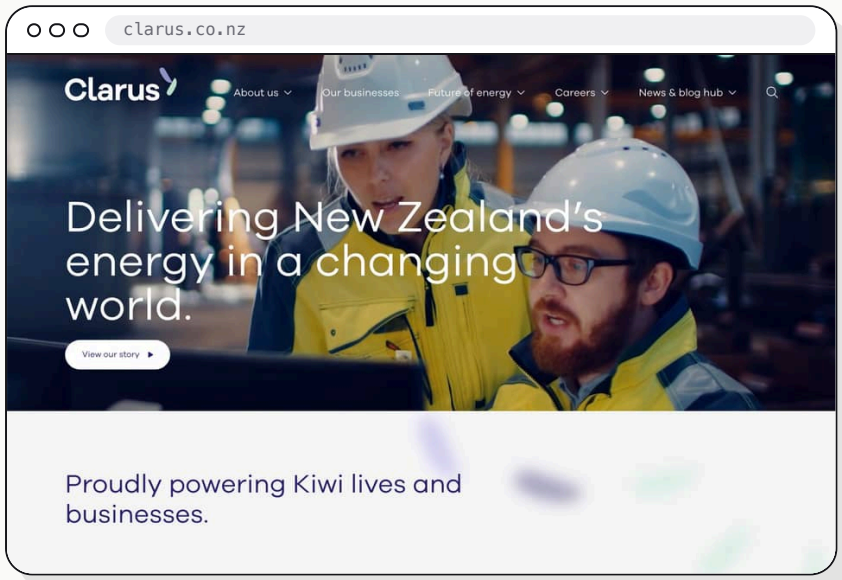

Maintenance and bug fixes for Canterbury's regional climate change information site.

It's time, Canterbury gives people in Canterbury/Waitaha reliable information about how climate change is affecting the region and how to adapt. The site covers what the region can expect, how councils and communities are responding, and how people can show their support. It runs as a headless build, with a Craft CMS backend feeding a Next.js front end over GraphQL.

I maintain both sides of the stack as part of the Plato development team. My work includes updating Craft CMS and its plugins to current versions, fixing a GraphQL response parsing issue in the front end's data fetching, and improving the success handling on the Mailchimp newsletter signup.

Craft CMS · Next.js · React · GraphQL · Tailwind CSS

Client It's time, Canterbury · **Services** Maintenance, Bug fixes and support, Web development · itstimecanterbury.co.nz

Energy company website · 2026 Maintained Plato Creative

Clarus website

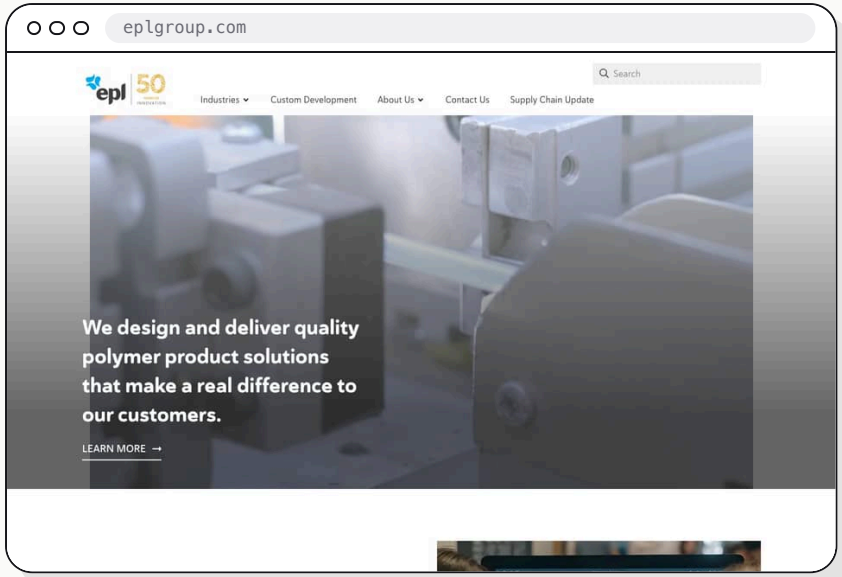

Maintenance and front-end fixes for the website of one of New Zealand's largest energy companies.

Clarus is the New Zealand energy group behind Firstgas, Rockgas, and Flexgas, supplying gas and energy services to homes and businesses across the country. Its website runs as a headless build, with a SilverStripe CMS feeding a Next.js front end.

I help maintain the site as part of the Plato development team. That includes keeping packages up to date across both the SilverStripe backend and the Next.js front end, and fixing front-end issues such as a navigation layout bug at tablet widths.

SilverStripe · Next.js · React · Tailwind CSS · PHP

Client Clarus · **Services** Maintenance, Bug fixes and support, Front-end development · clarus.co.nz

Manufacturer website · 2026 Maintained Plato Creative

EPL Group website

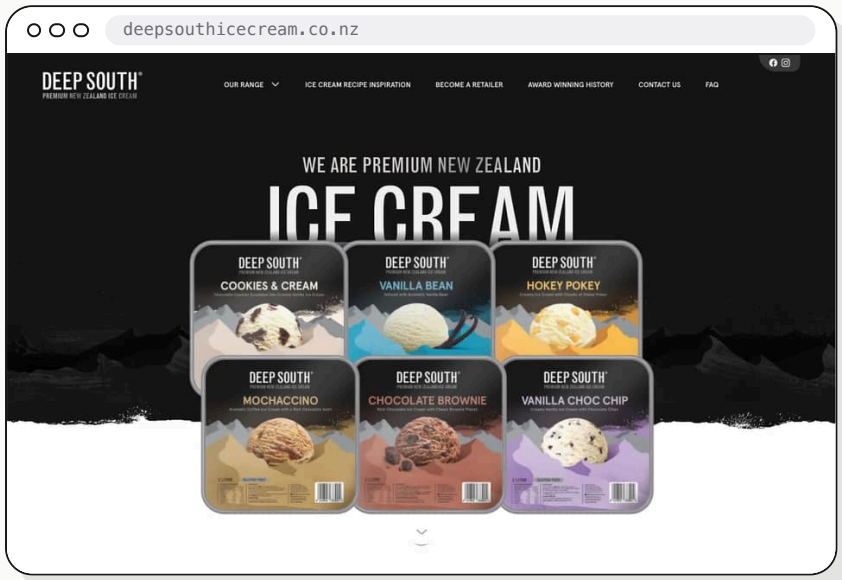

Maintenance and support for a New Zealand plastics manufacturer's Craft CMS website.

EPL Group is a New Zealand plastics manufacturer supplying products for horticulture, viticulture, and industry, including its Polynatural plant protection range, which has its own online store. The website runs on Craft CMS and presents the company's products, case studies, locations, and team.

I look after the site as part of the Plato development team. Recent work includes upgrading Craft CMS and its plugins, setting up the local development environment, moving email credentials out of the codebase into environment variables, and fixing the redirects that send old product pages to the Polynatural store.

Craft CMS PHP Twig SCSS jQuery

Client EPL Group · **Services** Maintenance, Bug fixes and support, Web development · eplgroup.com

Dairy brand websites · 2026 Maintained Plato Creative

Open Country Dairy brand websites

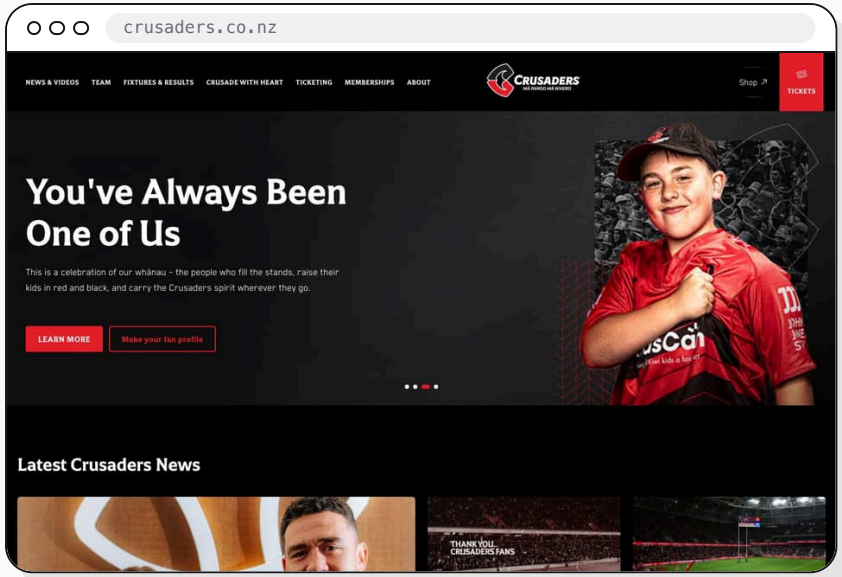

Maintenance and front-end updates across Open Country Dairy's consumer brand websites on a multi-site Craft CMS platform.

Open Country Dairy is one of New Zealand's largest dairy processors and exporters, part of the Talley's Group. Its consumer brands, Deep South Ice Cream, Motueka Creamery, and NZ Creameries, run as separate sites from a single multi-site Craft CMS install, including a Japanese-language site for Deep South.

I work on the platform as part of the Plato development team, making front-end updates across the brand sites. That includes rolling out updated logos and footer details after the brands moved under Open Country Dairy, tidying navigation, and adding an alert notification banner to the header of all three sites.

Craft CMS PHP Tailwind CSS Vue.js SCSS

Client Open Country Dairy · **Services** Web development, Maintenance · deepsouthicecream.co.nz

Sports team website · 2026 Maintained Plato Creative

Crusaders website

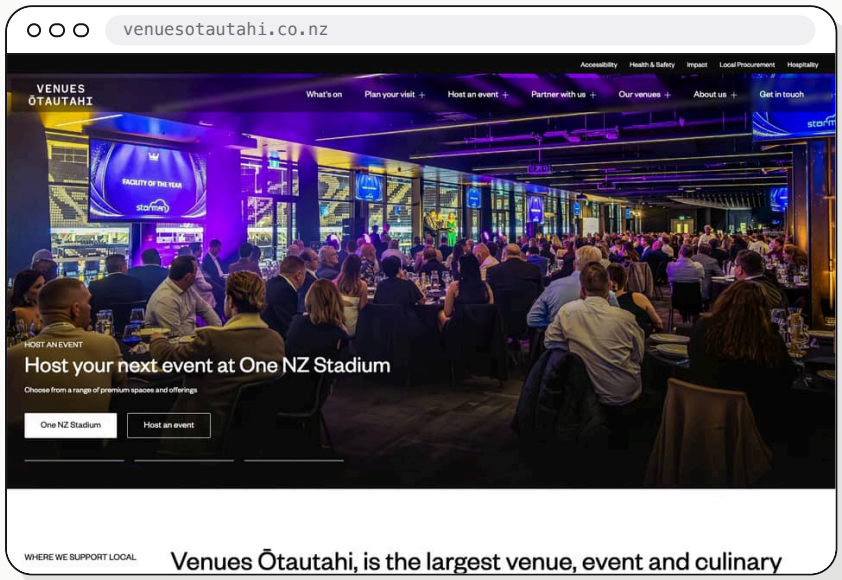

Maintenance and support for the official website of the Crusaders, Christchurch's Super Rugby team.

The Crusaders are the most successful team in Super Rugby history, based in Christchurch. Their website keeps fans across fixtures, results, news, and sign-ups, and it needs to hold up under the traffic spikes that come with every home game and finals run.

I maintain the site as part of the Plato development team, working on the SilverStripe templates and the Tailwind front-end. Recent work includes reworking the newsletter sign-up so fans land on the club's new registration platform, and removing the old form modal that went with it.

SilverStripe CMS · PHP · Tailwind CSS · Vite

Client Crusaders · **Services** Web development, Maintenance, Bug fixes and support · crusaders.co.nz

Event venue websites · 2026 Maintained Plato Creative

Venues Ōtautahi websites

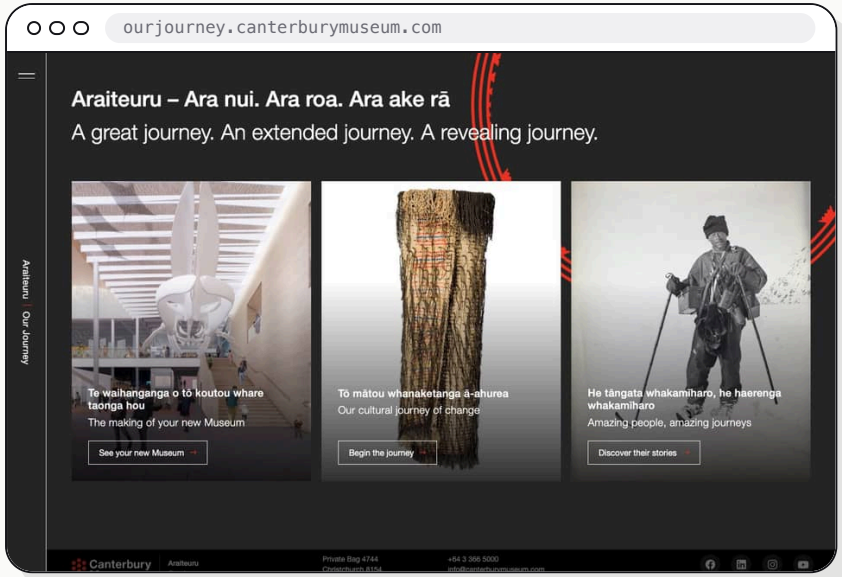

Maintenance and front-end fixes for the websites of Christchurch's major event venues.

Venues Ōtautahi manages Christchurch's major event venues, including Wolfbrook Arena, the Christchurch Town Hall, Apollo Projects Stadium and the new One New Zealand Stadium at Te Kaha. Its web platform is an Astro monorepo that runs both the main Venues Ōtautahi site and the One New Zealand Stadium site from a shared component library, with content managed in Storyblok.

I work on the platform as part of the Plato development team, making fixes and improvements to the shared components both sites rely on, including updates to the event hosting enquiry form.

Astro · Storyblok · React · Tailwind CSS · TypeScript

Client Venues Ōtautahi · **Services** Web development, Maintenance, Bug fixes and support · venuesotautahi.co.nz

Museum storytelling site · 2026 Maintained Plato Creative

Our Journey by Canterbury Museum

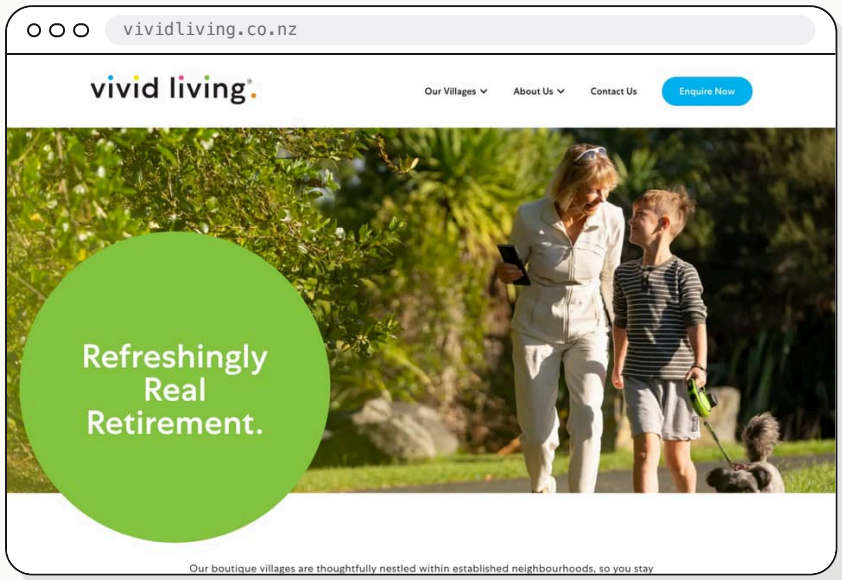

Front-end updates for Canterbury Museum's storytelling site built with Astro and Storyblok.

Our Journey is Canterbury Museum's storytelling site, publishing chapters about the museum, its people, and taonga while the Christchurch building goes through a major redevelopment. Built with Astro and Storyblok, it leans on rich imagery and animation to carry each story.

I contributed front-end updates as part of the Plato development team, adding content and links to the Next Chapter block that closes each story and refining the button styles used across the site.

Astro Storyblok Tailwind CSS GSAP TypeScript

Client Canterbury Museum · **Services** Front-end development, Maintenance · ourjourney.canterburymuseum.com

Retirement village website · 2026 Maintained Plato Creative

Vivid Living website

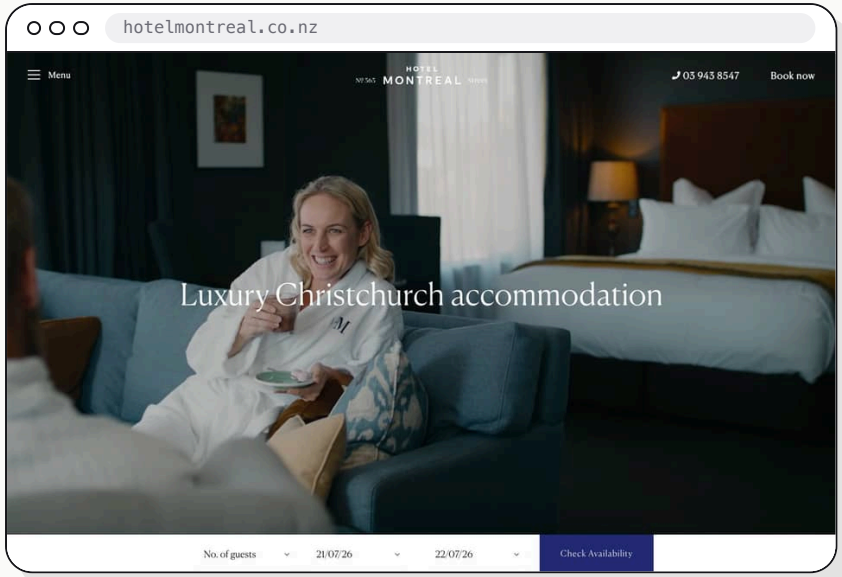

Maintenance and bug fixes for the website of Vivid Living, a New Zealand retirement village operator.

Vivid Living runs retirement villages at Red Beach and Karaka in Auckland. Their Craft CMS website showcases each village and its homes, and connects to the VCare village management system so availability and waitlist information stays current.

I help maintain the site as part of the Plato development team, keeping Craft CMS and its plugins up to date and fixing bugs, including a template caching issue that duplicated accordion content across pages.

Craft CMS PHP Tailwind CSS Vue.js SCSS

Client Vivid Living · **Services** Maintenance, Bug fixes and support · vividliving.co.nz

Boutique hotel website · 2026 Maintained Plato Creative

Hotel Montreal website

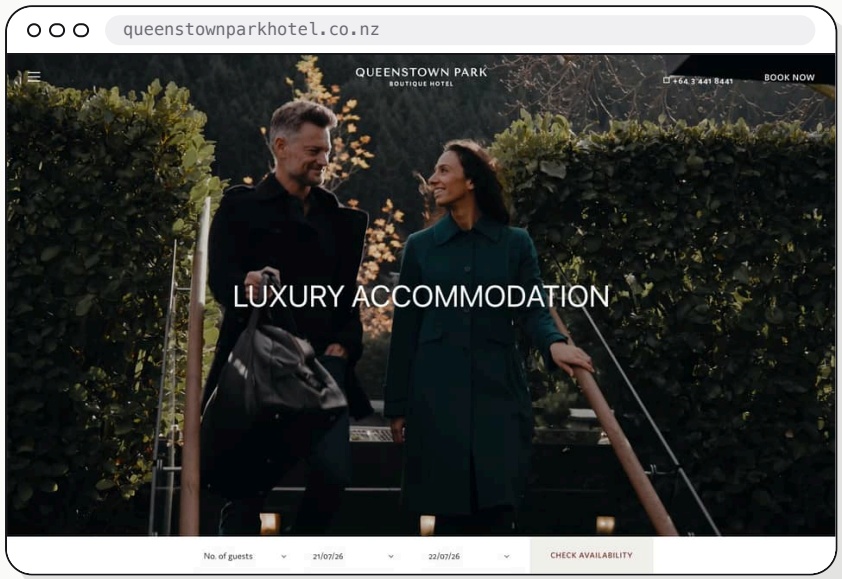

Platform upgrades and maintenance for a boutique hotel in central Christchurch.

Hotel Montreal is a boutique hotel on Montreal Street in Christchurch, close to Hagley Park and the city centre. Its website showcases the rooms, suites, and packages, and lets guests check availability and book directly online.

I handled a major platform upgrade for the site as part of the Plato development team, moving it from Craft CMS 4 to Craft CMS 5 and migrating its content fields to work with the new version, keeping the site secure and up to date.

Craft CMS PHP Twig Vue.js SCSS

Client Hotel Montreal · **Services** Maintenance, CMS development, Web development · hotelmontreal.co.nz

Boutique hotel website · 2026 Maintained Plato Creative

Queenstown Park Hotel website

CMS upgrades and maintenance for a boutique hotel in Queenstown.

Queenstown Park Hotel is a boutique hotel in central Queenstown, in New Zealand's Southern Lakes region. The website presents the hotel's rooms and packages, points guests to things to do around Queenstown, and handles booking enquiries.

I maintain the site as part of the Plato development team. I upgraded it from Craft CMS 4 to Craft CMS 5, moved it to PHP 8.2, and brought its full set of plugins up to current versions so the hotel keeps running on supported, secure software.

Craft CMS PHP Vue.js Tailwind CSS

Client Queenstown Park Hotel · **Services** Maintenance, Web development · queenstownparkhotel.co.nz

Hotel website · 2026 Maintained Plato Creative

The Commodore Hotel website

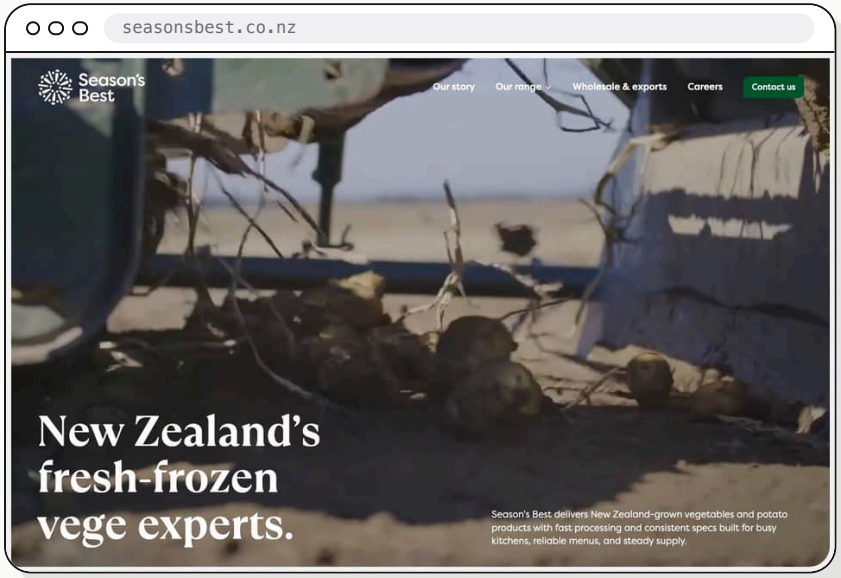

Platform upgrades and maintenance for a family-run Christchurch airport hotel's Craft CMS website.

The Commodore is a family-run 4.5-star hotel near Christchurch Airport, known for its gardens, restaurant, and conference facilities. Its website showcases rooms, dining, and event spaces, and drives direct bookings for guests flying in and out of the city.

I maintain the site as part of the Plato development team. Most recently I upgraded the platform from Craft 4 to Craft 5, updating the CMS, its plugins, and the project configuration to keep the site secure and current.

Craft CMS PHP Tailwind CSS Vue.js SCSS

Client The Commodore Hotel · **Services** Web development, Maintenance · commodorehotel.co.nz

Food producer website · 2026 Maintained Plato Creative

Season's Best website

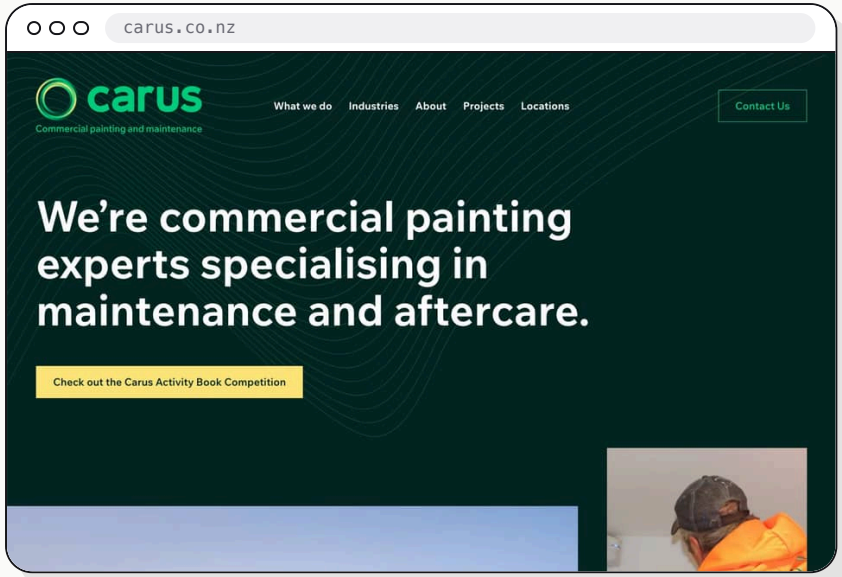

Site improvements and maintenance for a New Zealand fresh-frozen vegetable and potato supplier.

Season's Best is an Ashburton-based supplier of New Zealand-grown fresh-frozen vegetables and potato products, serving commercial kitchens, wholesalers, and export partners. Their marketing site runs on Storyblok and Astro, with content-managed pages covering their product range, growers, and story.

I worked on the site as part of the Plato development team after launch, setting up marketing redirects for their careers page and extending the Storyblok text content block with a link highlight style that editors can toggle on.

Storyblok Astro TypeScript Tailwind CSS Netlify

Client Season's Best · **Services** Web development, Maintenance · seasonsbest.co.nz

Commercial services website · 2026 Maintained Plato Creative

Carus Group website

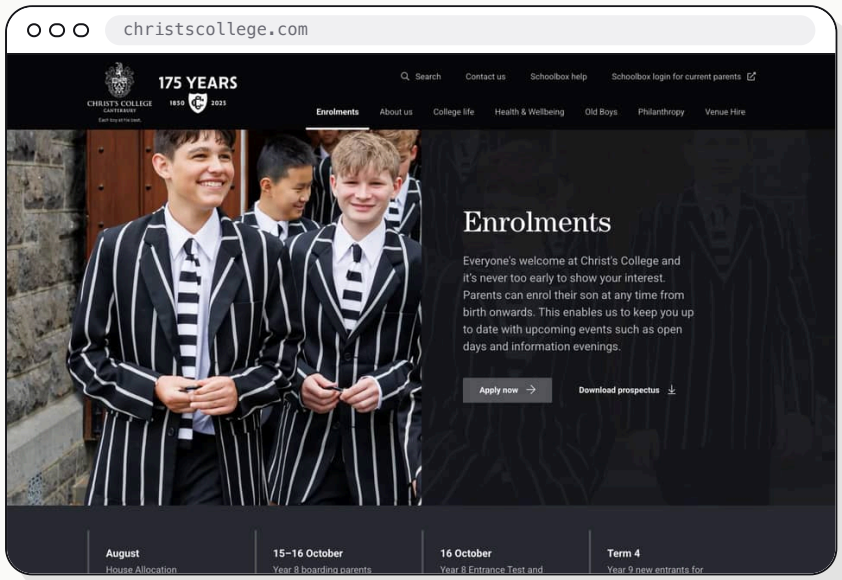

Maintenance and dependency updates for a headless Craft CMS and Next.js site.

Carus Group provides commercial painting and property maintenance services across New Zealand. Their website runs as a headless build, with Craft CMS managing content and a Next.js front end serving the pages.

I maintain the site as part of the Plato development team. I ran a maintenance pass that updated the Craft CMS plugins, applied the resulting configuration changes, and set up the DDEV local development environment the team uses to work on the site.

Craft CMS · Next.js · React · Tailwind CSS · PHP

Client Carus Group · **Services** Web development, Maintenance · carus.co.nz

Independent school website · 2026 Maintained Plato Creative

Christ's College website

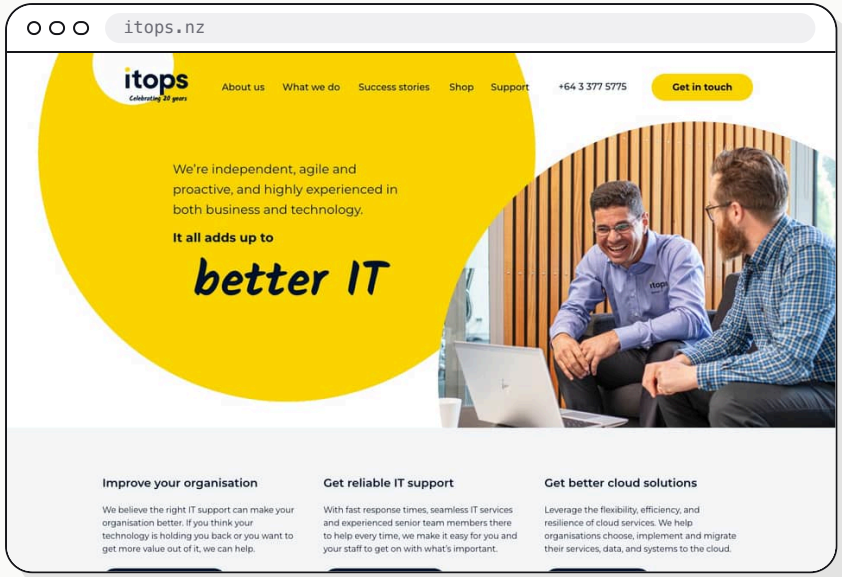

Ongoing maintenance for the website of Christ's College, one of New Zealand's oldest independent schools.

Christ's College is an independent Anglican boys' school in Christchurch, founded in 1850 and the oldest independent school in New Zealand. Its website runs on Craft CMS and serves prospective families, current students, and the wider school community with admissions information, news, and events.

I maintain the site as part of the Plato development team: updating Craft CMS and its plugins, renewing licenses, and testing the site to make sure everything keeps working after each update.

Craft CMS · PHP · Vue.js · Tailwind CSS

Client Christ's College, Canterbury · **Services** Web development, Maintenance · christscollege.com

IT services company website · 2026 Maintained Plato Creative

iTops website

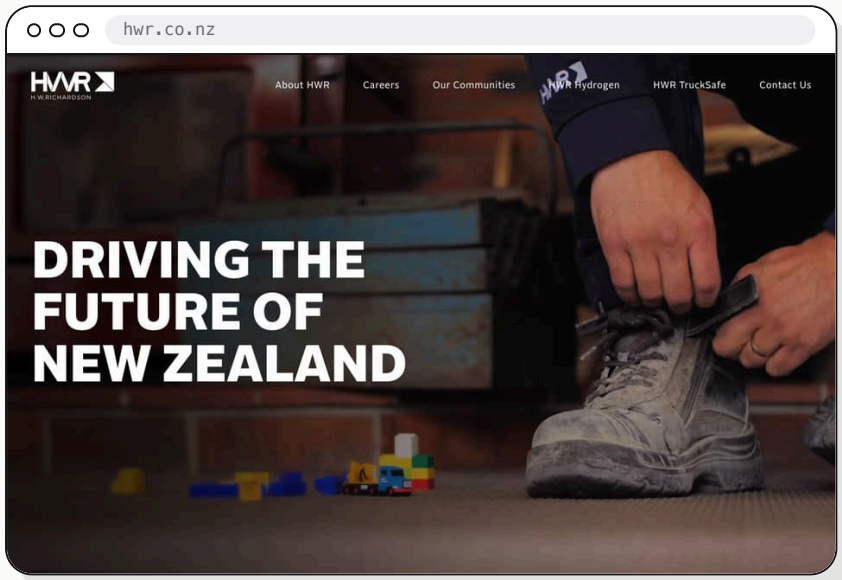

Maintenance and platform upgrades for a Christchurch IT support company's Craft CMS website.

iTops provides IT support and services to organisations across Christchurch and New Zealand, and has been doing so for more than 20 years. Their website runs on Craft CMS and introduces their services, team, and stories to prospective clients.

I maintain the site as part of the Plato development team. I brought Craft CMS and its plugins up to current versions and set up a standardised local development environment, which keeps the site secure and makes future work on it faster and more consistent.

Craft CMS PHP Twig Tailwind CSS SCSS

Client iTops · **Services** Web development, Maintenance · `itops.nz`

Corporate group website · 2026 Maintained Plato Creative

HW Richardson Group website

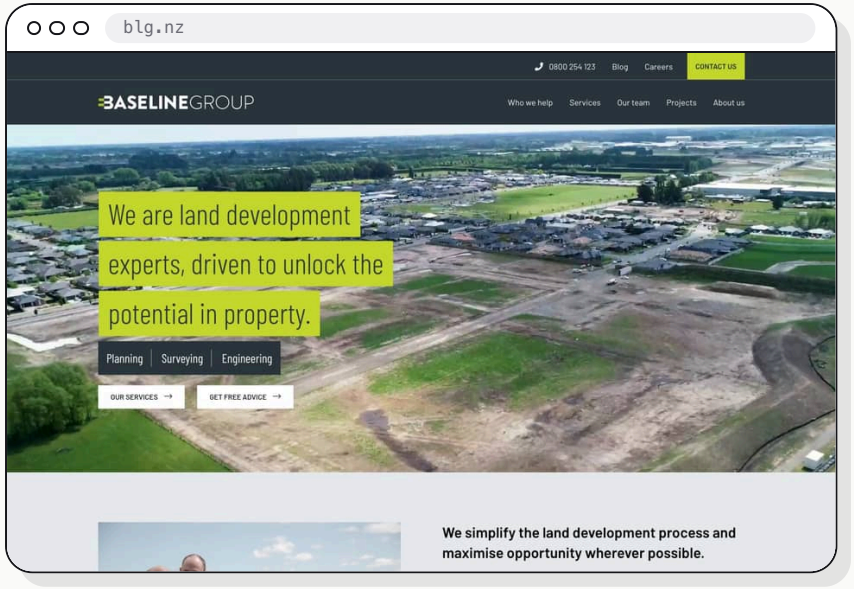

Ongoing maintenance for the corporate website of HW Richardson Group, one of southern New Zealand's largest family-owned business groups.

HW Richardson Group is a family-owned group of companies based in Invercargill, with businesses across transport, fuel distribution, and contracting in New Zealand and Australia. Its website tells the group's story, showcases its industries and communities, and drives recruitment across its many companies.

I maintain the site as part of the Plato development team, keeping Craft CMS, its plugins, and front-end dependencies up to date so the site stays secure and stable.

Craft CMS PHP Vue.js Tailwind CSS SCSS

Client HW Richardson Group · **Services** Web development, Maintenance · `hwr.co.nz`

Consultancy website · 2026 Maintained Plato Creative

Baseline Group website

Maintenance and support for the website of a New Zealand land development consultancy.

Baseline Group is a New Zealand land development consultancy covering surveying, planning, and engineering. Their website runs on Craft CMS and presents their services, their team, and current job openings, so it needs to stay reliable for the clients and candidates who reach out through it.

I maintain the site as part of the Plato development team. My work has focused on keeping the enquiry forms healthy, including tightening the spam protection so automated submissions get filtered out before they reach the client.

Craft CMS PHP Twig Tailwind CSS SCSS

Client Baseline Group · **Services** Maintenance, Bug fixes and support · `blg.nz`

Fuel distributor website · 2026 Maintained Plato Creative

Allied Petroleum website

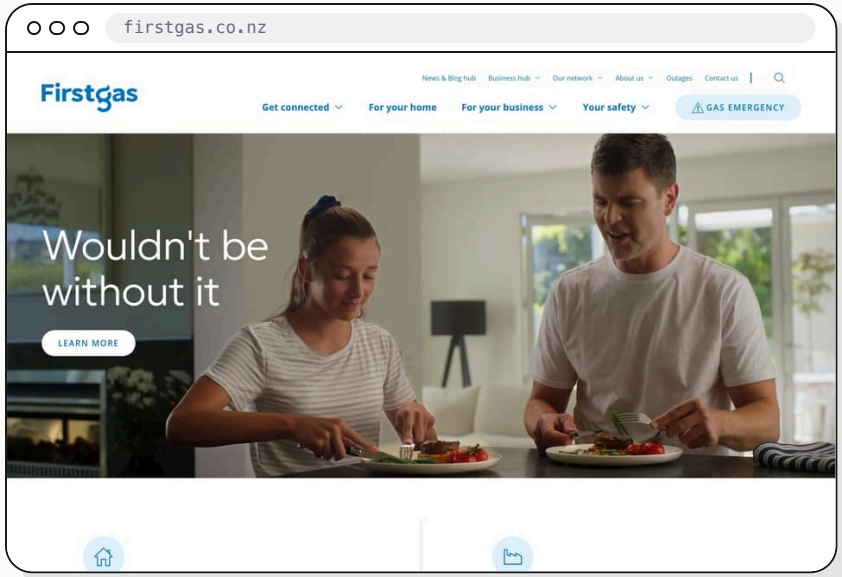

Maintenance and platform updates for Allied Petroleum's Craft CMS website.

Allied Petroleum is one of New Zealand's largest fuel distributors, part of the HW Richardson Group, supplying bulk fuel, lubricants, and fuel card services to businesses across the country. Their website runs on Craft CMS and covers everything from product ranges to depot locations and customer services.

I maintain the site as part of the Plato development team, keeping Craft CMS and its plugins up to date and testing the site after each round of updates so it stays secure and stable.

Craft CMS PHP Vue.js Tailwind CSS

Client Allied Petroleum · **Services** Web development, Maintenance · `alliedpetroleum.co.nz`

Energy company website · 2026 Maintained Plato Creative

Firstgas website

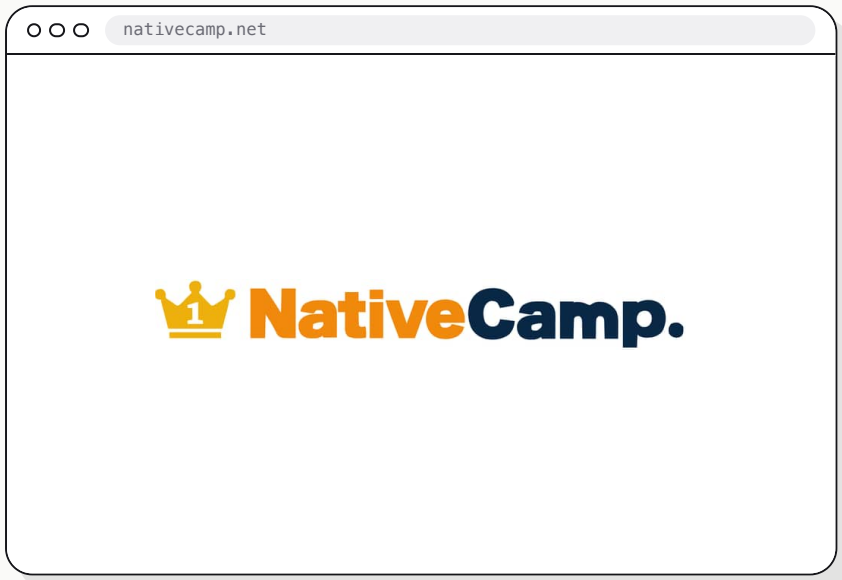

Maintenance and dependency updates for the website of Firstgas, New Zealand's gas network company.

Firstgas owns and operates gas pipeline networks across the North Island of New Zealand, delivering natural gas to homes and businesses as part of the Clarus energy group. Its website runs as a headless build, with a SilverStripe CMS backend and a Next.js front end.

I work on the site as part of Plato's development team, running maintenance passes across both apps: updating the SilverStripe and Next.js dependencies and putting the changes through UAT before release.

SilverStripe 5 · Next.js · React · PHP · Tailwind CSS

Client Firstgas · **Services** Maintenance, Web development · `firstgas.co.nz`

Online learning platform · 2023

NativeCamp online English platform

Feature development and maintenance for one of Asia's largest online English learning platforms.

NativeCamp connects students with tutors around the world for one-on-one English lessons, around the clock. Working on a platform at this scale means every change has to be fast, reliable, and easy for thousands of daily users to pick up without instructions.

I worked across the student-facing site and internal tooling: building new features, improving existing flows, and keeping the platform stable while the business kept growing.

PHP · Laravel · jQuery · MySQL

Client NativeCamp · **Services** Web development, Feature development, Maintenance · `nativecamp.net`

Online store · 2022

Nature Bijoux e-commerce

Online store development for a French jewellery brand selling handcrafted pieces worldwide.

Nature Bijoux crafts jewellery from natural materials and sells to customers across Europe and beyond. Their store needed to present products beautifully while keeping the path from browsing to checkout short and simple.

I helped develop and maintain the storefront: product pages, catalogue browsing, and the day-to-day fixes and improvements that keep an online store selling.

PHP · JavaScript · MySQL

Client Nature Bijoux · **Services** E-commerce development, Maintenance · nature.fr/en

Online store · 2022

Franck Herval e-commerce

Storefront development for a designer jewellery brand with retailers across Europe.

Franck Herval designs statement jewellery collections sold through retailers and directly online. The store had to reflect the craft behind the product while staying quick to browse and easy to buy from.

I worked on storefront features and ongoing improvements, keeping the shopping experience polished across collections, seasons, and campaigns.

PHP · JavaScript · MySQL

Client Franck Herval · **Services** E-commerce development, Maintenance · franckherval.com

Brand website · 2022

Les Chamanes website

Brand website for a French jewellery label, built to showcase collections and tell the brand story.

Les Chamanes is a jewellery brand with a strong visual identity. The website's job was to carry that identity online: collections presented like a lookbook, with the story of the brand woven through.

I developed and maintained the site, translating the brand's design direction into fast, responsive pages that work as well on a phone as on a large screen.

PHP · JavaScript · CSS

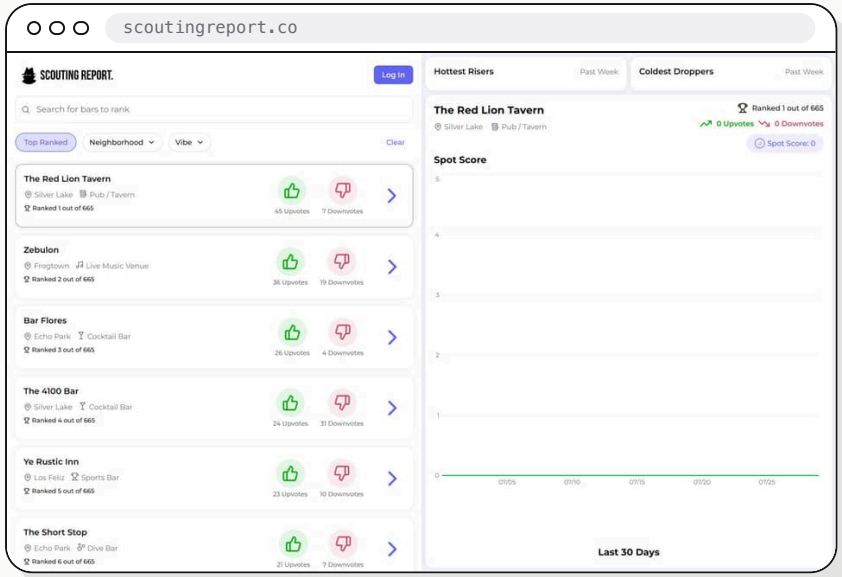

Client Les Chamanes · **Services** Web development, Brand website · leschamanes.com/en

Bar ranking app · 2026

Scouting Report bar ranking app

Community-driven bar ranking app for Los Angeles, where votes decide each spot's place on the leaderboard.

Scouting Report ranks bars across LA neighbourhoods like Silver Lake, Echo Park, Los Feliz, and Frogtown by community upvotes and downvotes. Every spot holds a live rank out of 665, with a 30-day Spot Score trend and weekly Hottest Risers and Coldest Droppers boards showing which bars are moving.

I built the app in React with Vite and Tailwind CSS: searchable rankings with neighbourhood and vibe filters, per-bar detail views with Recharts score charts, and voting tied to user accounts.

React · Vite · Tailwind CSS · Recharts

Junk removal website · 2025

Junk Movers website

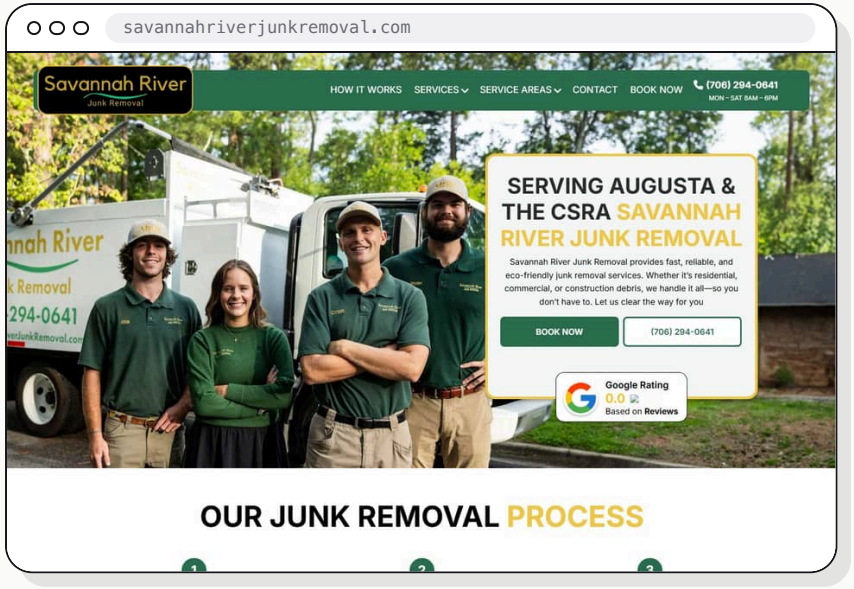

Website for a Salt Lake Valley junk removal company that donates or recycles up to 60% of what it hauls.

Junk Movers runs same-day junk removal across the Salt Lake Valley, from house cleanouts to construction debris and light demolition. The site leads with their recycling story, donating or recycling up to 60% of every load, and makes booking or calling a one-tap action.

I built the site on WordPress with dedicated service and service-area pages, hosted on Kinsta with a staging environment for safe releases.

WordPress · PHP · JavaScript · CSS

Client Junk Movers · **Services** WordPress development, Web development · `junkmovers.com`

Junk removal website · 2025

Savannah River Junk Removal website

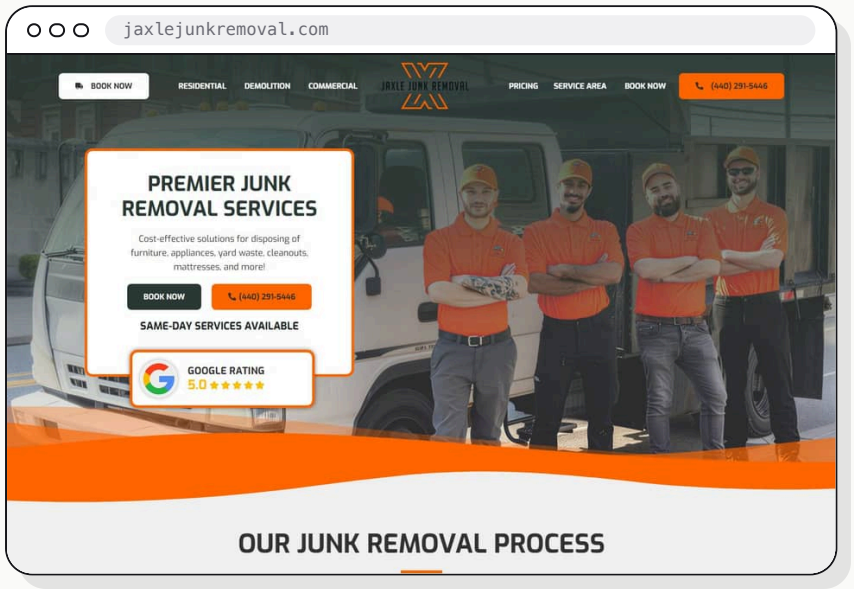

Website for a family-owned junk removal company serving Augusta, Georgia and the CSRA.

Savannah River Junk Removal is a family-owned, licensed and insured hauler covering Augusta and the Central Savannah River Area, backed by hundreds of five-star Google reviews and a donation and recycling program.

I developed the WordPress site around that social proof: service pages for cleanouts, debris removal, and commercial work, with quote requests kept one click away throughout.

WordPress · PHP · JavaScript · CSS

Client Savannah River Junk Removal · **Services** WordPress development, Web development · `savannahriverjunkremoval.com`

Junk removal website · 2025

Jaxle Junk Removal website

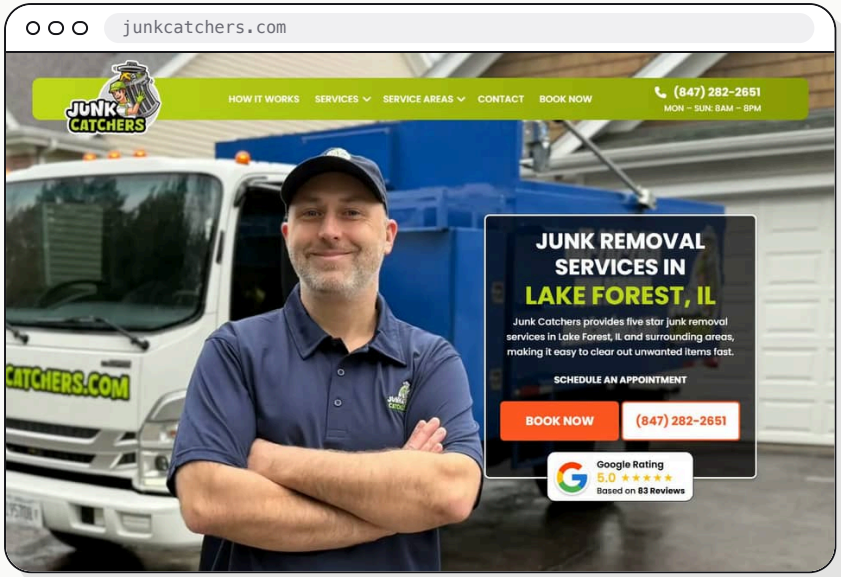

Website for a Cleveland junk removal company with same-day service and upfront pricing.

Jaxle Junk Removal serves the greater Cleveland area with same-day and next-day pickups, transparent upfront pricing, and a donation-first approach to whatever can be reused.

I built the site on WordPress with Elementor, covering residential and commercial services, basement and attic cleanouts, and free quote requests.

WordPress · Elementor · PHP · CSS

Client Jaxle Junk Removal · **Services** WordPress development, Web development · `jaxlejunkremoval.com`

Junk removal website · 2025

Junk Catchers website

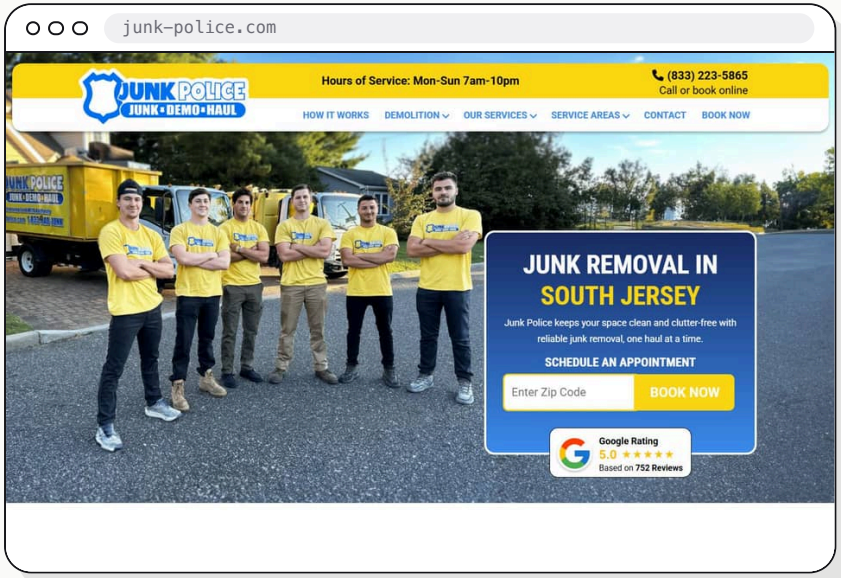

Website for a junk removal team serving Lake Forest and Chicago's North Shore suburbs.

Junk Catchers handles furniture, appliances, estate cleanouts, and commercial junk across Lake Forest, Illinois and the North Shore, donating usable items to local non-profits and recycling to keep waste out of landfill.

I developed the WordPress site with clear service pages and same-day booking prompts that suit how customers actually find a hauler: quickly, on their phone.

WordPress · PHP · JavaScript · CSS

Client Junk Catchers · **Services** WordPress development, Web development · junkcatchers.com

Junk removal website · 2025

Junk Police website

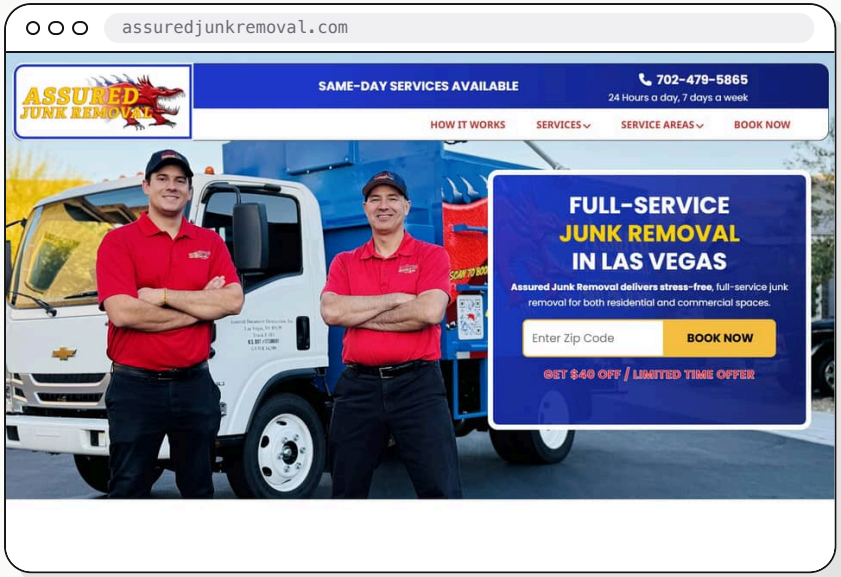

Website for a family-run junk removal and demolition business in South Jersey.

Junk Police is a South Jersey family business offering same-day and next-day junk removal, cleanouts, and demolition, with a policy of donating and recycling everything it can.

I built the WordPress site with service and cleanout pages and fast calls to action, hosted on WP Engine with WP Rocket caching for quick loads.

WordPress · PHP · JavaScript · CSS

Client Junk Police · **Services** WordPress development, Web development · junk-police.com

Junk removal website · 2025

Assured Junk Removal website

Website for a full-service junk removal company covering Las Vegas, Henderson, and North Las Vegas.

Assured Junk Removal offers same-day, full-service hauling across the Las Vegas valley, from furniture and appliances to construction debris, estate cleanouts, and light demolition, with an eco-friendly donation and recycling angle.

I developed the WordPress site with service pages for each job type and prominent licensed-and-insured trust signals.

WordPress · PHP · JavaScript · CSS

Client Assured Junk Removal · **Services** WordPress development, Web development · assuredjunkremoval.com

Junk removal website · 2025

Dumpster Duo website

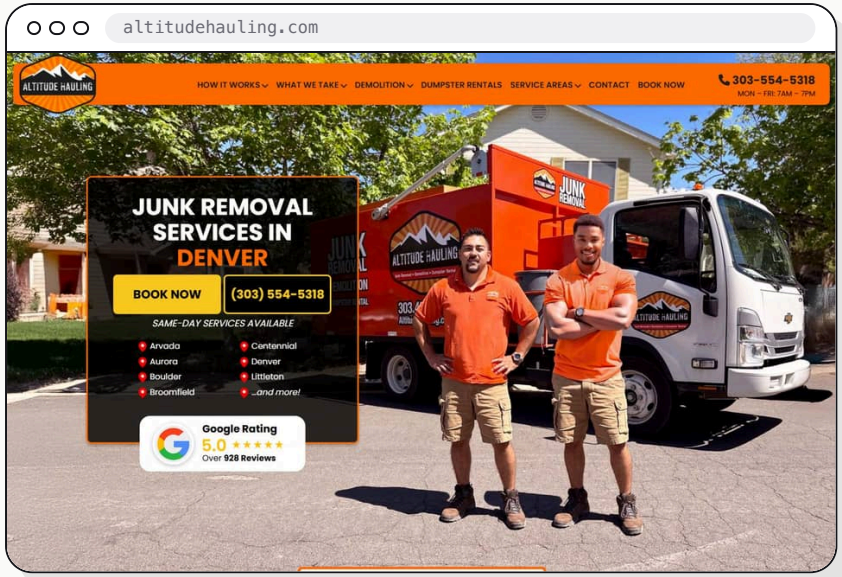

Website for a St. Louis company pairing dumpster rentals with full-service junk removal.

Dumpster Duo covers both sides of the cleanup job in St. Louis and nearby Illinois communities: rent a dumpster and fill it yourself, or have the team haul everything away, with donations routed through local charities.

I built the WordPress site to present both offers cleanly, with same-day availability and licensed-and-insured messaging throughout.

WordPress · PHP · JavaScript · CSS

Client Dumpster Duo · **Services** WordPress development, Web development · dumpsterduo.com

Junk removal website · 2025

Altitude Hauling website

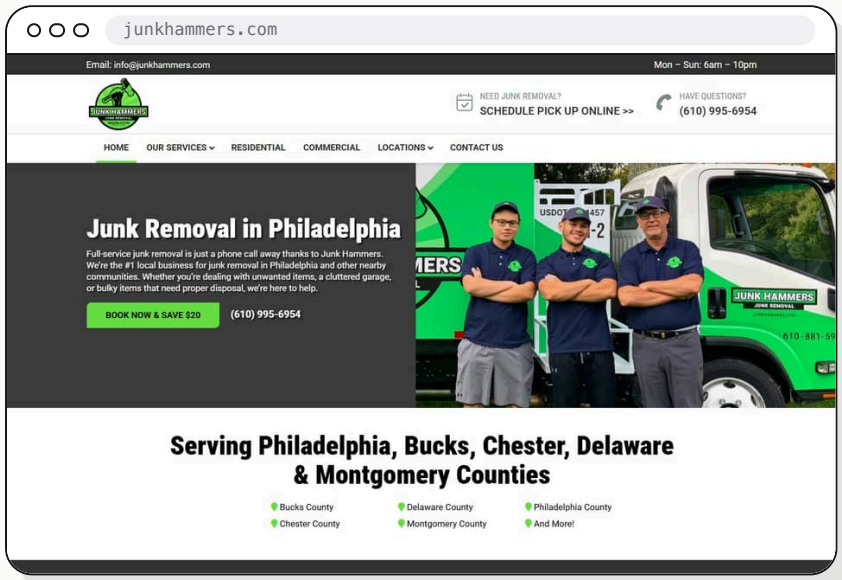

Website for a locally owned Denver junk removal company with same-day service.

Altitude Hauling handles furniture, appliances, estate cleanouts, construction debris, and hot tub removal across Denver, donating usable items to local charities along the way.

I developed the WordPress site with a service-first structure and booking prompts designed to convert local search traffic into scheduled pickups.

WordPress · PHP · JavaScript · CSS

Client Altitude Hauling · **Services** WordPress development, Web development · `altitudehauling.com`

Junk removal website · 2025

Junk Hammers website

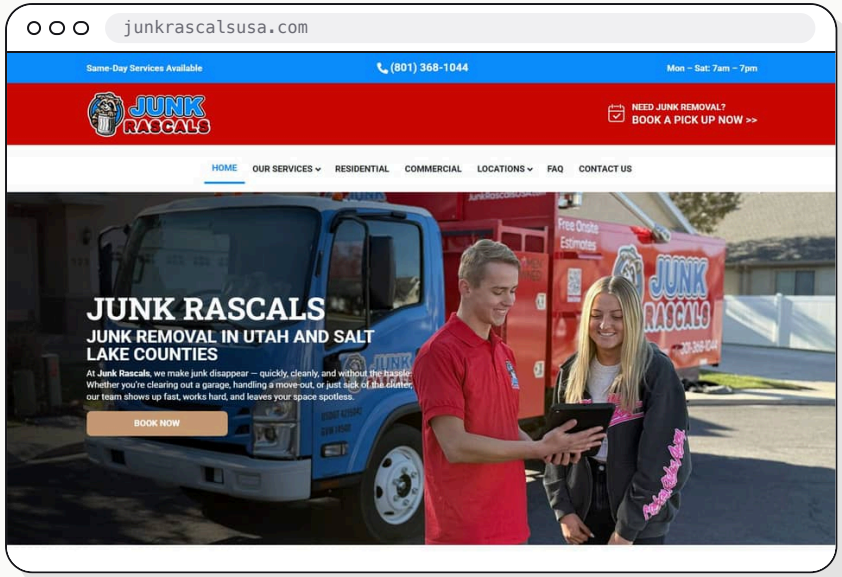

Website for a Greater Philadelphia junk removal company with online booking discounts.

Junk Hammers serves the Greater Philadelphia and Delaware Valley area with same-day hauling, from furniture and hoarding cleanouts to concrete and deck removal, with an eco-friendly donation and recycling focus.

I built the WordPress site with service pages for every job type and a $20 online booking discount to nudge visitors from browsing to booking.

WordPress · PHP · JavaScript · CSS

Client Junk Hammers · **Services** WordPress development, Web development · `junkhammers.com`

Junk removal website · 2025

Junk Rascals website

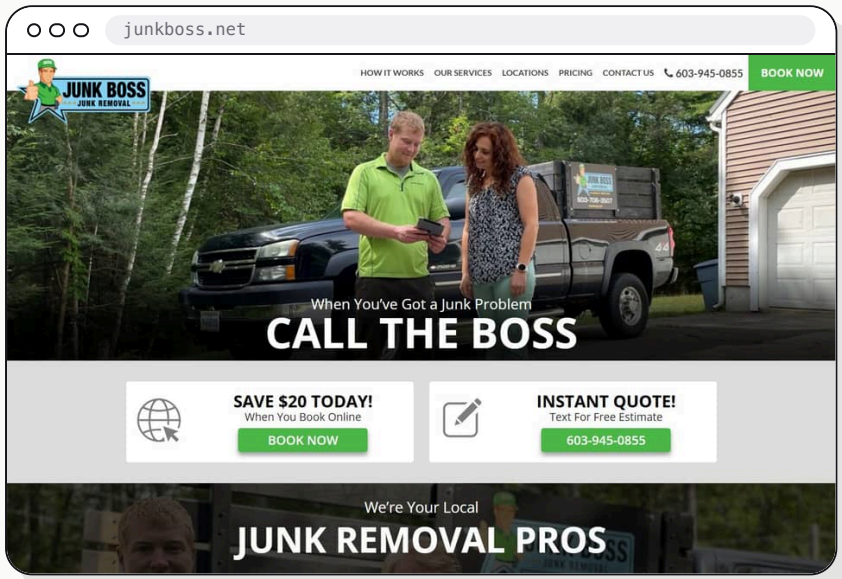

Website for a Utah junk removal crew serving Utah County and Salt Lake City.

Junk Rascals runs same-day junk removal across Utah County and Salt Lake City under the playful tagline "Sneaking In & Removing Junk", with donations and recycling keeping loads out of landfill.

I developed the WordPress site to carry that personality while staying conversion-focused: clear services, service areas, and instant quote paths.

WordPress · PHP · JavaScript · CSS

Client Junk Rascals · **Services** WordPress development, Web development · junkrascalsusa.com

Junk removal website · 2025

Junk Boss website

Website for a veteran-owned junk removal company on the New Hampshire Seacoast.

Junk Boss is a veteran-owned and operated hauler covering the NH Seacoast and towns like Dover, Concord, Manchester, and Salem, offering same-day service, full cleanouts, and light demolition.

I built the WordPress site with the veteran-owned story up front and a straightforward path from any page to a booking.

WordPress · PHP · JavaScript · CSS

Client Junk Boss · **Services** WordPress development, Web development · junkboss.net

Junk removal website · 2025

Power Junk Removal website

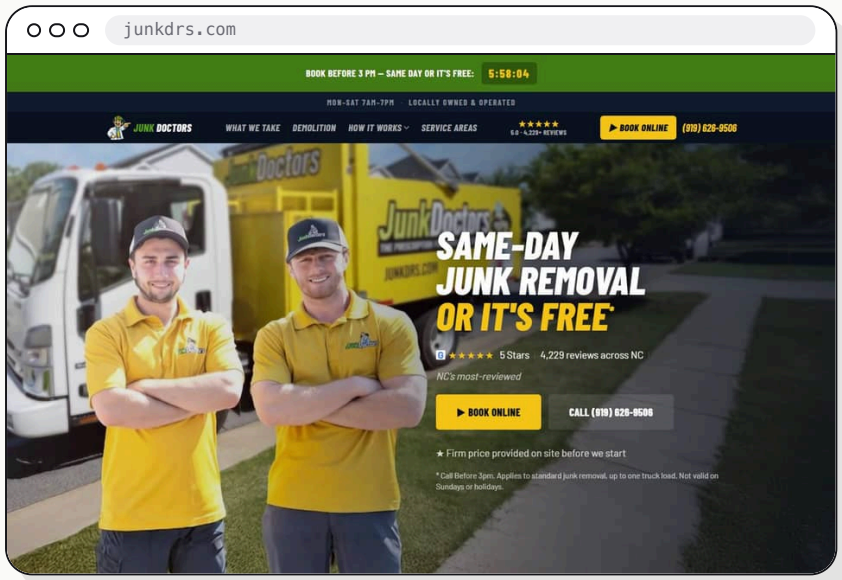

Website for a West Palm Beach junk removal company with same-day and next-day service.

Power Junk Removal serves West Palm Beach and South Florida with furniture removal, property cleanouts, yard debris, and even boat and RV removal, all with free upfront estimates and eco-friendly disposal.

I developed the WordPress site with per-service pages and a quick estimate form so customers can book without a phone call.

WordPress · PHP · JavaScript · CSS

Client Power Junk Removal · **Services** WordPress development, Web development · `powerjunkremoval.us`

Junk removal website · 2025

Junk Doctors website

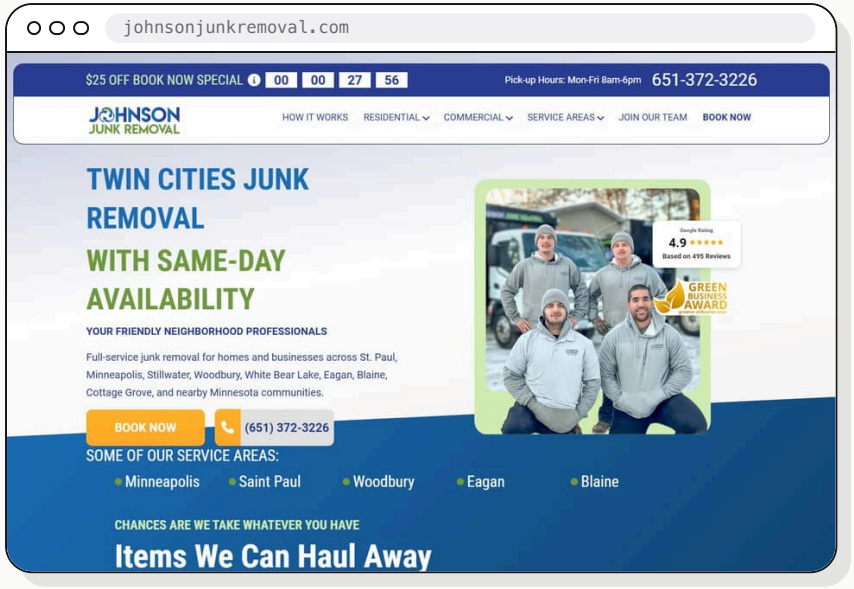

Fast Astro-built website for a North Carolina junk removal company with 4,000+ five-star reviews.

Junk Doctors covers Raleigh, Charlotte, and Greensboro with a bold promise: same-day junk removal or it's free. With over 4,000 five-star Google reviews, the site's job is to get that credibility in front of visitors fast.

The site is built on Astro, which ships almost no JavaScript, so pages load quickly even on mobile connections where most junk removal searches happen.

Astro · JavaScript · CSS

Client Junk Doctors · **Services** Web development · `junkdrs.com`

Junk removal website · 2025

Johnson Junk Removal website

Website for a Twin Cities junk removal company with same-day availability.

Johnson Junk Removal is a locally owned Minnesota business serving St. Paul and the Twin Cities, handling everything from furniture and appliances to decks, boats, and full property cleanouts.

I built the WordPress site with service and area pages, hosted on WP Engine behind Cloudflare with WP Rocket caching to keep it fast.

WordPress · PHP · JavaScript · CSS

Client Johnson Junk Removal · **Services** WordPress development, Web development · johnsonjunkremoval.com

Junk removal website · 2025

VanGo Junk Removal website

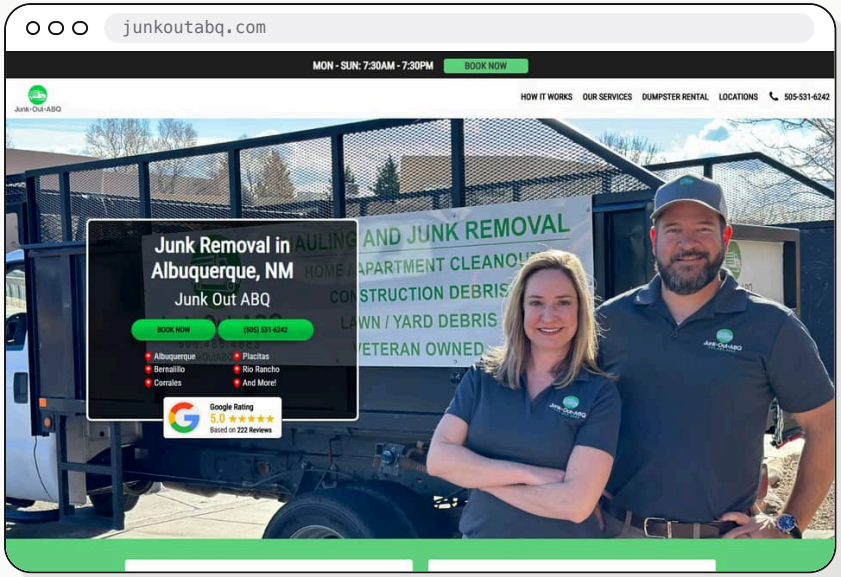

Website for a Long Island junk removal company with town-by-town service area pages.

VanGo Junk Removal covers Long Island with residential and commercial junk removal, apartment and estate cleanouts, and donation pickups, routing reusable items to local non-profits.

I developed the WordPress site with an extensive town-by-town service area structure, giving every Long Island community its own landing page for local search.

WordPress · PHP · JavaScript · CSS

Client VanGo Junk Removal · **Services** WordPress development, Web development · vangonewyork.com

Junk removal website · 2025

Junk Out ABQ website

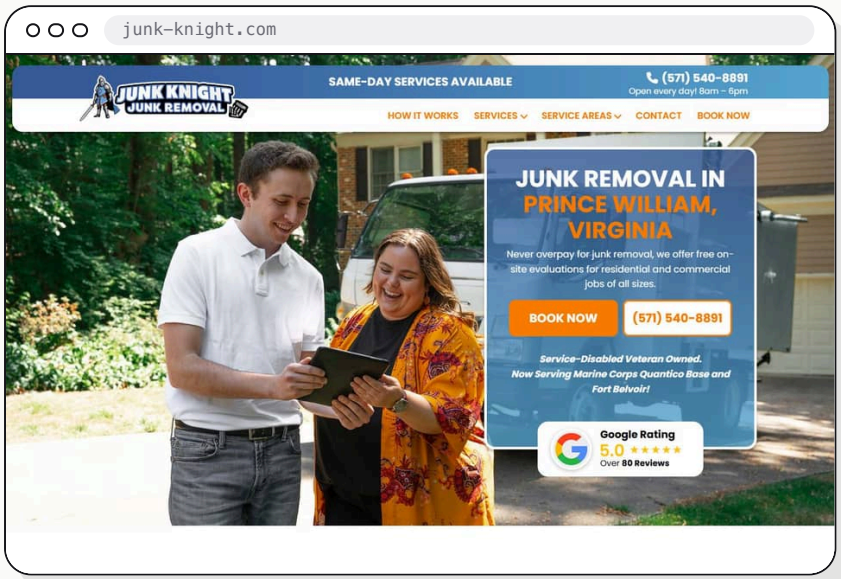

Website for a veteran-owned Albuquerque junk removal company.

Junk Out ABQ is a veteran-owned hauler in Albuquerque with "We Haul It All" messaging, same-day service, a veteran discount, and a recycling-first approach to disposal.

I built the WordPress site with service pages for furniture, appliances, construction debris, and cleanouts, keeping quotes and phone contact one tap away.

WordPress · PHP · JavaScript · CSS

Client Junk Out ABQ · **Services** WordPress development, Web development · junkoutabq.com

Junk removal website · 2025

Junk Knight website

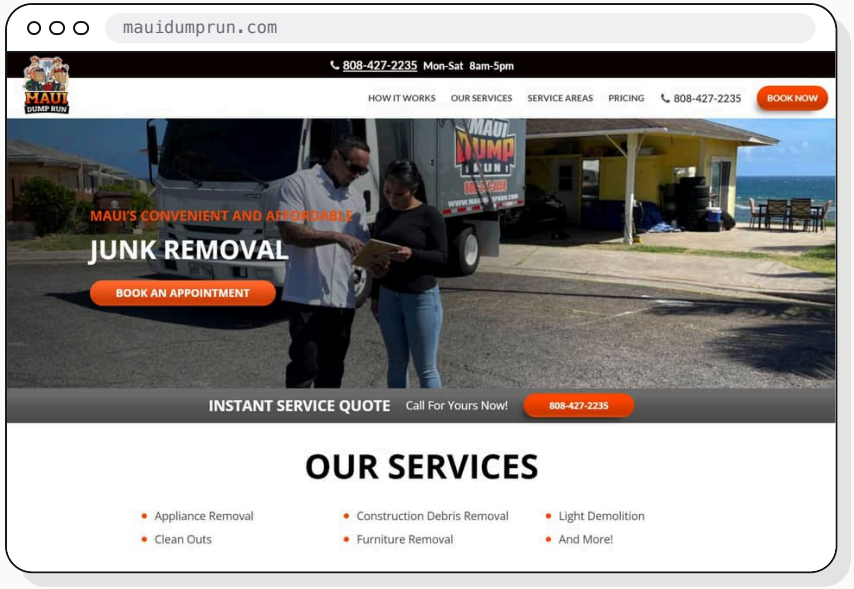

Website for a veteran-owned junk removal company in Northern Virginia.

Junk Knight serves Prince William County and nearby Fairfax, Manassas, Fredericksburg, and Stafford with same-day junk removal, estate and hoarding cleanouts, and shed demolition, all with a donation and recycling angle.

I developed the WordPress site with per-service and per-county pages so the business ranks where its customers actually search.

WordPress · PHP · JavaScript · CSS

Client Junk Knight · **Services** WordPress development, Web development · junk-knight.com

Junk removal website · 2025

Maui Dump Run website

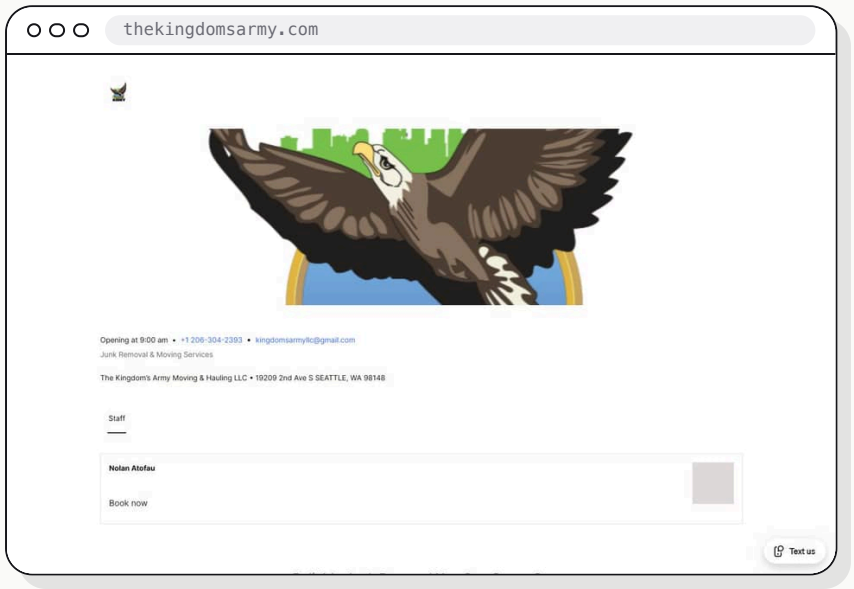

Website for Maui's locally owned junk removal service.

Maui Dump Run is a locally owned, non-franchise hauler offering same and next-day junk removal across Kahului, Kihei, Lahaina, and greater Maui.

I built the WordPress site, hosted on WP Engine, with service pages from appliance removal to estate cleanouts and a booking flow suited to island-wide coverage.

WordPress · PHP · JavaScript · CSS

Client Maui Dump Run · **Services** WordPress development, Web development · `mauidumprun.com`

Junk removal website · 2025

The Kingdoms Army booking site

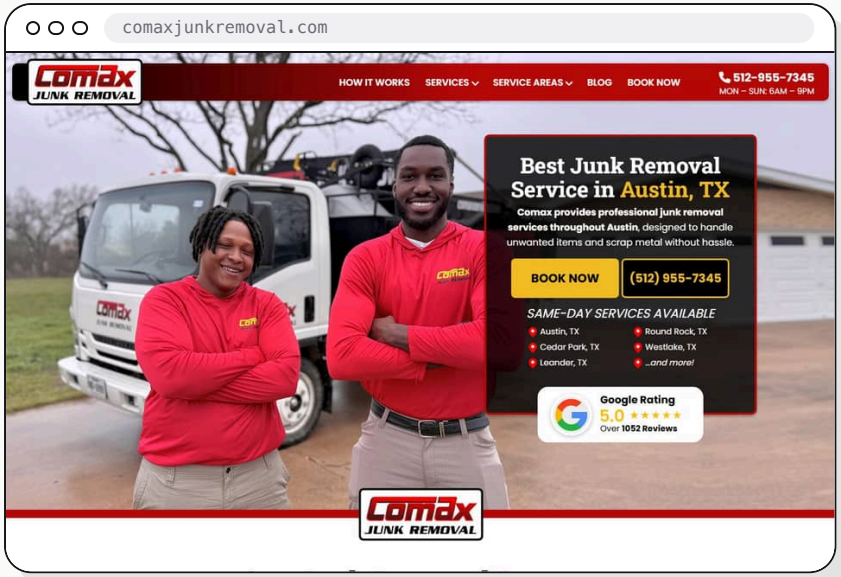

Booking-first web presence for a Seattle–Tacoma moving and hauling company.

The Kingdoms Army Moving & Hauling covers the Seattle–Tacoma area with junk removal, dumpster rentals, moving, and cleanouts, promising same-day service tailored to each project.

The site runs on Square Online with booking built in, so customers go straight from finding the business to reserving a time slot.

Square Online · CSS

Client The Kingdoms Army Moving & Hauling · **Services** Web development · `thekingdomsarmy.com`

Junk removal website · 2025

Comax Junk Removal website

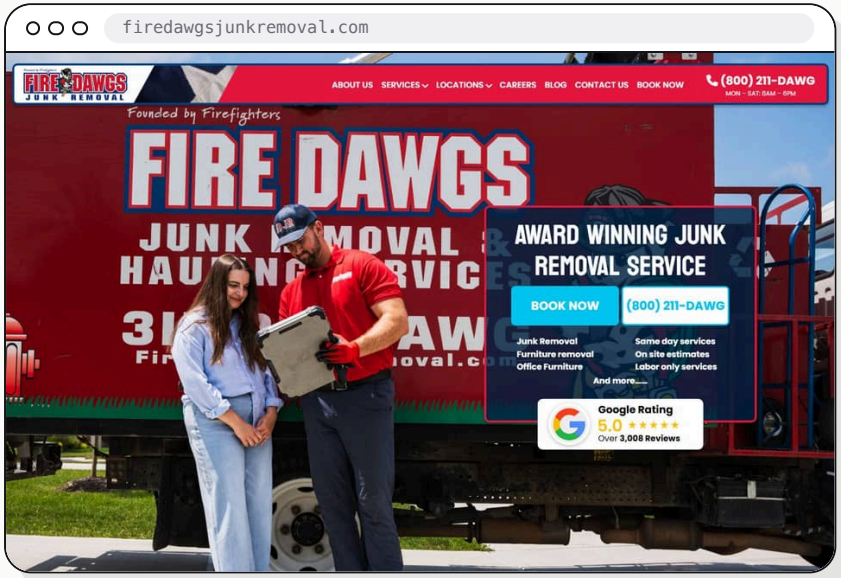

Website for a family-owned Austin junk removal company.

Comax Junk Removal is a family-owned, licensed and insured business in Austin, Texas offering same-day service with free estimates and an eco-friendly donation and recycling approach.

I developed the WordPress site with focused pages for appliance, furniture, and hot tub removal plus residential and commercial work.

WordPress · PHP · JavaScript · CSS

Client Comax Junk Removal · **Services** WordPress development, Web development · comaxjunkremoval.com

Junk removal website · 2025

Fire Dawgs Junk Removal website

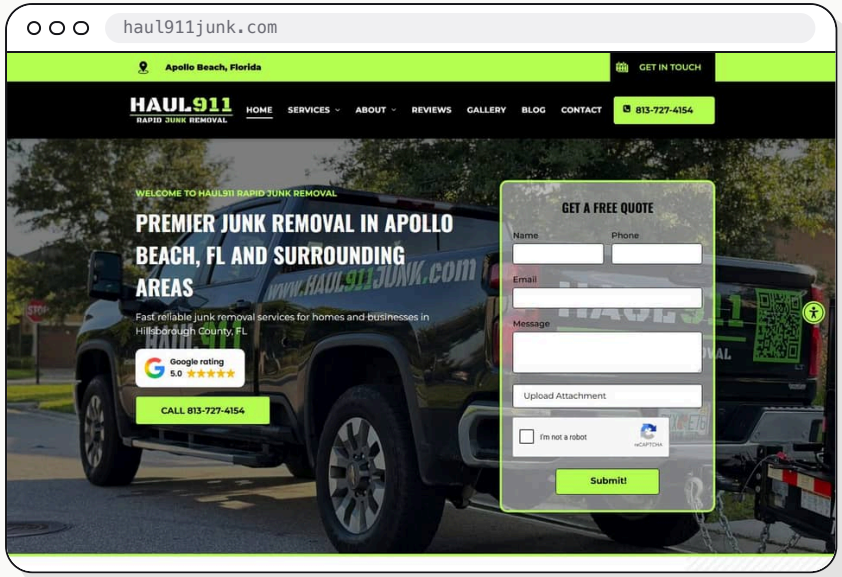

Website for an award-winning, veteran-founded junk removal company operating across three states.

Fire Dawgs is a veteran-founded, BBB A+ rated company serving Indianapolis, Fort Wayne, Bloomington, and Lafayette in Indiana plus Columbus, Ohio and Houston, Texas, diverting over 60% of hauled items through donation and recycling.

I worked on the WordPress site that supports this multi-city operation, with thousands of reviews surfaced as social proof and location-specific landing pages.

WordPress · PHP · JavaScript · CSS

Client Fire Dawgs Junk Removal · **Services** WordPress development, Web development · firedawgsjunkremoval.com

Junk removal website · 2025

Haul911 Rapid Junk Removal website

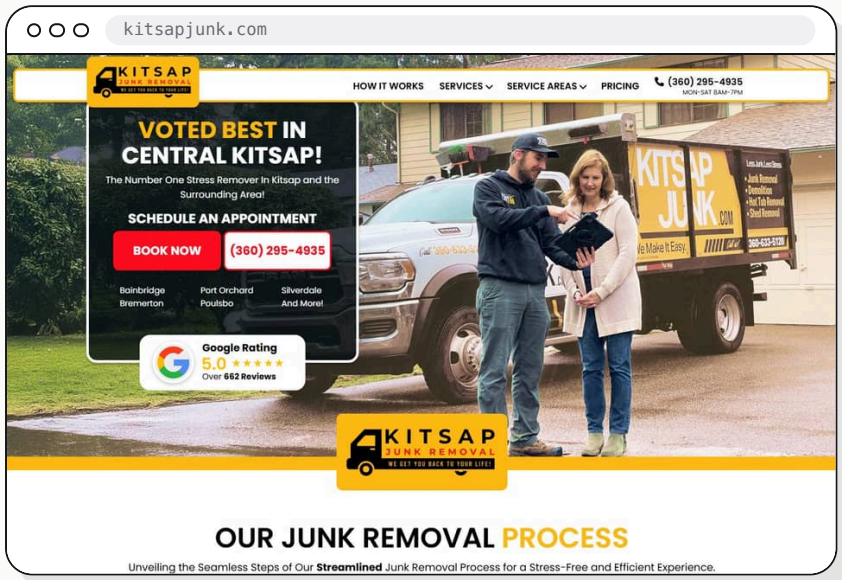

Website for a junk removal service in Apollo Beach, Florida.

Haul911 offers same-day junk removal in Apollo Beach and surrounding Florida communities, from furniture and appliances to estate cleanouts and yard debris, donating and recycling what it can.

The site is built on the Duda platform with a lightweight page structure that keeps quotes and calls front and centre.

Duda · JavaScript · CSS

Client Haul911 Rapid Junk Removal · **Services** Web development · haul911junk.com

Junk removal website · 2025

Kitsap Junk Removal website

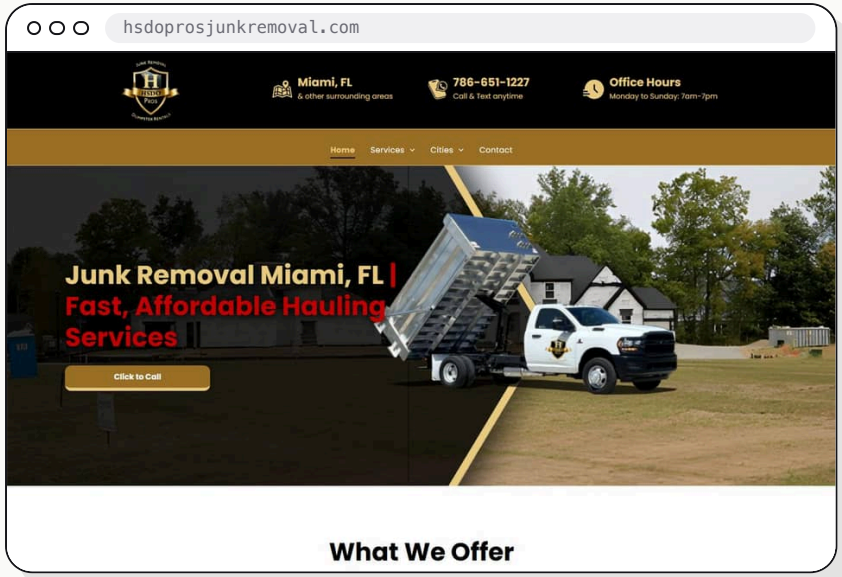

Website for a family-owned junk removal company voted best in Central Kitsap.

Kitsap Junk Removal serves Bremerton, Silverdale, Port Orchard, Poulsbo, and Bainbridge Island in Washington, donating usable items to local non-profits like Bremerton Foodline and the Kitsap Humane Society.

I built the WordPress site with the "Voted Best in Central Kitsap" endorsement front and centre and same or next-day pickup as the core call to action.

WordPress · PHP · JavaScript · CSS

Client Kitsap Junk Removal · **Services** WordPress development, Web development · kitsapjunk.com

Junk removal website · 2025

HSDO Junk Removal website

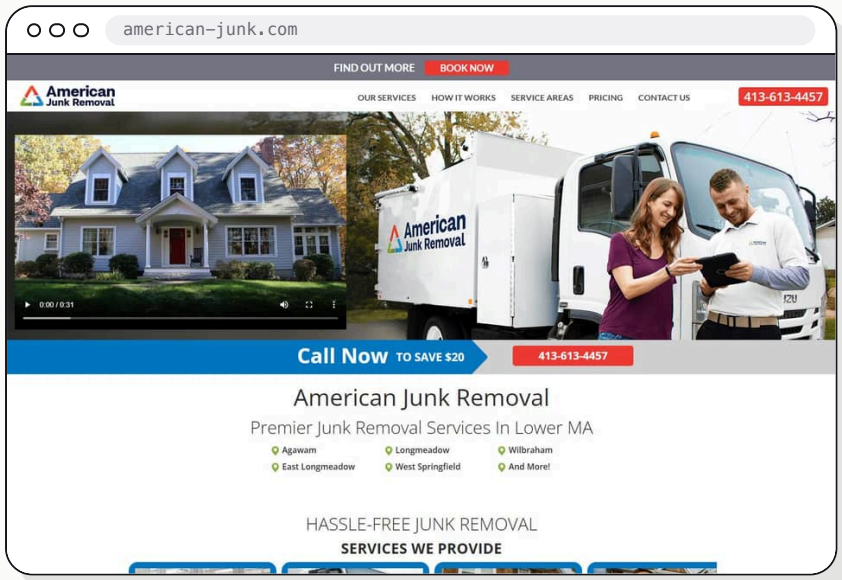

Website for a Miami junk removal and demolition service.

HSDO Junk Removal covers Miami and Orlando with fast, affordable hauling, from furniture and appliances to hot tubs and demolition jobs, with same-day service and free quotes.

The site is built on the Duda platform with an eco-friendly donation and recycling message woven through every service page.

Duda · JavaScript · CSS

Client HSDO Junk Removal · **Services** Web development · hsdoprosjunkremoval.com

Junk removal website · 2025

American Junk Removal website

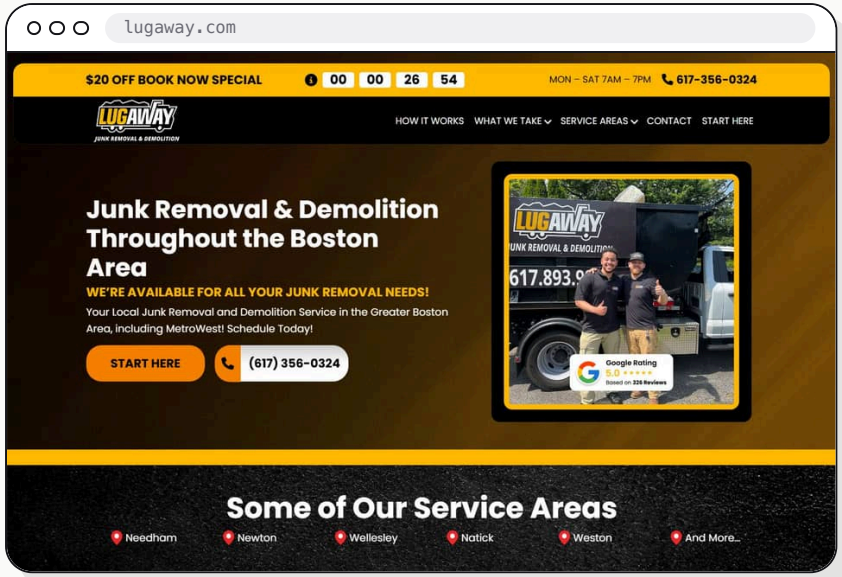

Website for a locally owned junk removal team in East Longmeadow, Massachusetts.

American Junk Removal offers same-day hauling across western Massachusetts, from appliance and construction debris removal to full estate and house cleanouts, donating and recycling as much as possible.

I developed the WordPress site, hosted on WP Engine, with structured service pages and search-friendly metadata.

WordPress · PHP · JavaScript · CSS

Client American Junk Removal · **Services** WordPress development, Web development · american-junk.com

Junk removal website · 2025

Lug Away website

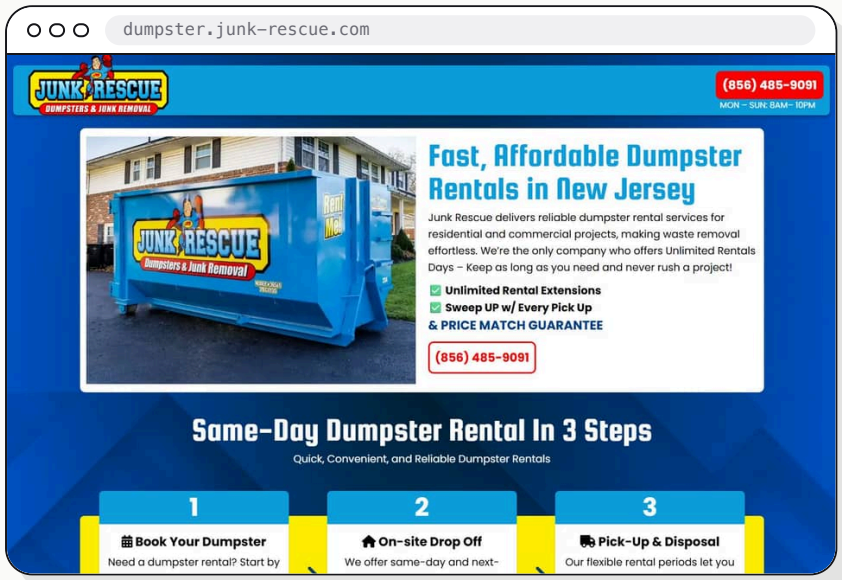

Website for a family-owned Boston junk removal and demolition company.

Lug Away serves the Greater Boston Area with junk removal, basement cleanouts, interior demolition, and 24/7 emergency service, running 15-yard dump trucks with a donation and recycling focus.

I built the WordPress site to handle a broad service catalogue while keeping same-day booking the clear next step on every page.

WordPress · PHP · JavaScript · CSS

Client Lug Away · **Services** WordPress development, Web development · `lugaway.com`

Dumpster rental website · 2025

Junk Rescue dumpster rentals website

Dumpster rental website for Junk Rescue, serving New Jersey and Pennsylvania.

Junk Rescue rents 10 to 40-yard roll-off dumpsters across New Jersey and Pennsylvania, with same-day delivery, unlimited rental days, and eco-friendly disposal.

I built this dedicated dumpster subdomain site on WordPress with Elementor, structured around a simple three-step booking process and per-size dumpster pages.

WordPress · Elementor · PHP · CSS

Client Junk Rescue · **Services** WordPress development, Web development · `dumpster.junk-rescue.com`

Junk removal website · 2025

CA Junk Masters website

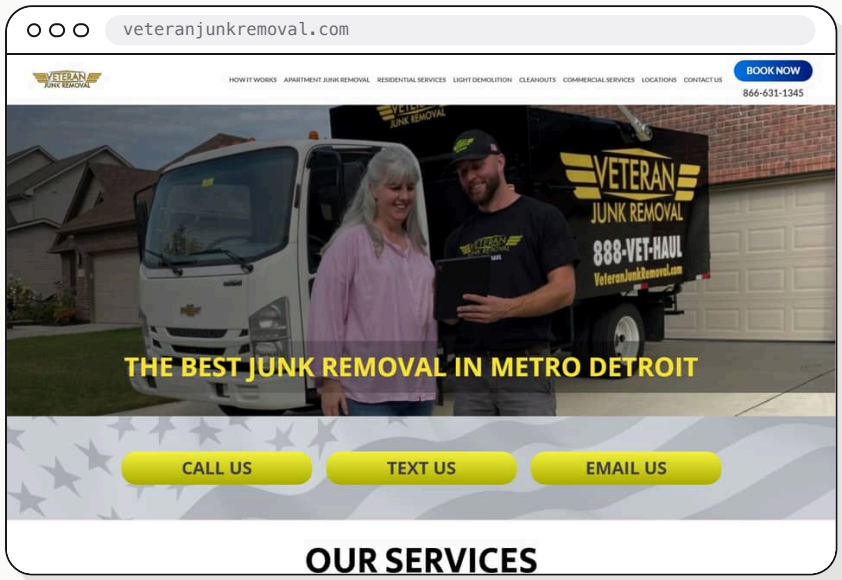

Website for a top-rated junk removal company in Riverside and the Inland Empire.

CA Junk Masters positions itself as the number one rated junk removal service in Riverside and California's Inland Empire, with same-day service, demolition work, and eco-friendly disposal.

I developed the WordPress site, hosted on WP Engine behind Cloudflare, with service pages and trust signals matched to that top-rated positioning.

WordPress · PHP · JavaScript · CSS

Client CA Junk Masters · **Services** WordPress development, Web development · cajunkmasters.com

Junk removal website · 2025

Veteran Junk Removal website

Website for a veteran-branded junk removal company in Metro Detroit.

Veteran Junk Removal serves Metro Detroit with full-service hauling under a simple promise: dispose, donate, and recycle. Customers can schedule by call, text, or email.

I built the WordPress site, hosted on WP Engine behind Cloudflare, with the dispose-donate-recycle story leading and every service one click from a booking.

WordPress · PHP · JavaScript · CSS

Client Veteran Junk Removal · **Services** WordPress development, Web development · veteranjunkremoval.com

Junk removal website · 2025

Capital City Junk Haulers website

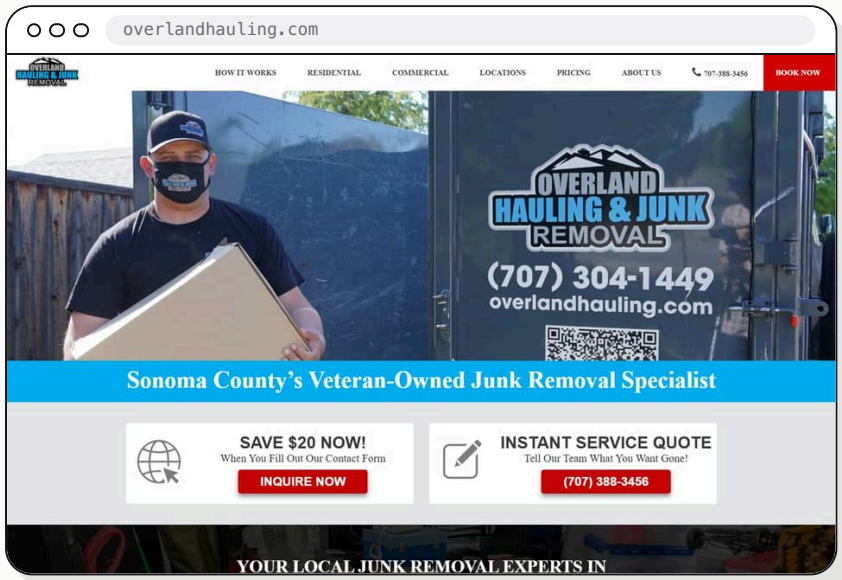

Website for a Tallahassee junk removal and dumpster rental company.

Capital City Junk Haulers combines junk removal, dumpster rental, cleanouts, and demolition across greater Tallahassee and towns like Crawfordville, Havana, Monticello, and Quincy.

I developed the WordPress site to present both the hauling and dumpster sides of the business, with same-day service and donation messaging throughout.

WordPress · PHP · JavaScript · CSS

Client Capital City Junk Haulers · **Services** WordPress development, Web development · capitalcityjunkhaulers.com

Junk removal website · 2025

Overland Hauling website

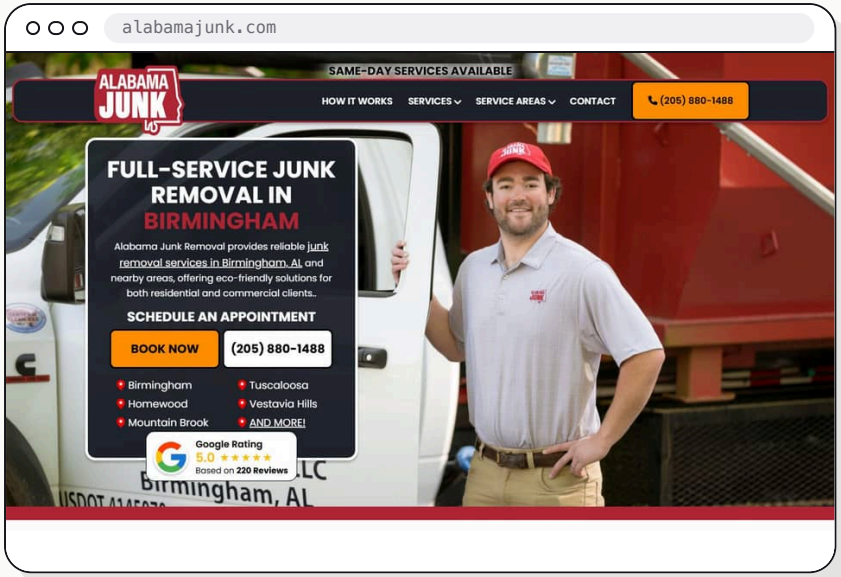

Website for a veteran-owned junk removal company in Sonoma County, California.

Overland Hauling & Junk Removal is veteran-owned and operated, covering Sonoma County with junk removal, construction debris, estate cleanouts, and hot tub and yard waste removal.

I built the WordPress site with a clean service structure and review-driven social proof to convert local searches.

WordPress · PHP · JavaScript · CSS

Client Overland Hauling & Junk Removal · **Services** WordPress development, Web development · overlandhauling.com

Junk removal website · 2025

Alabama Junk website

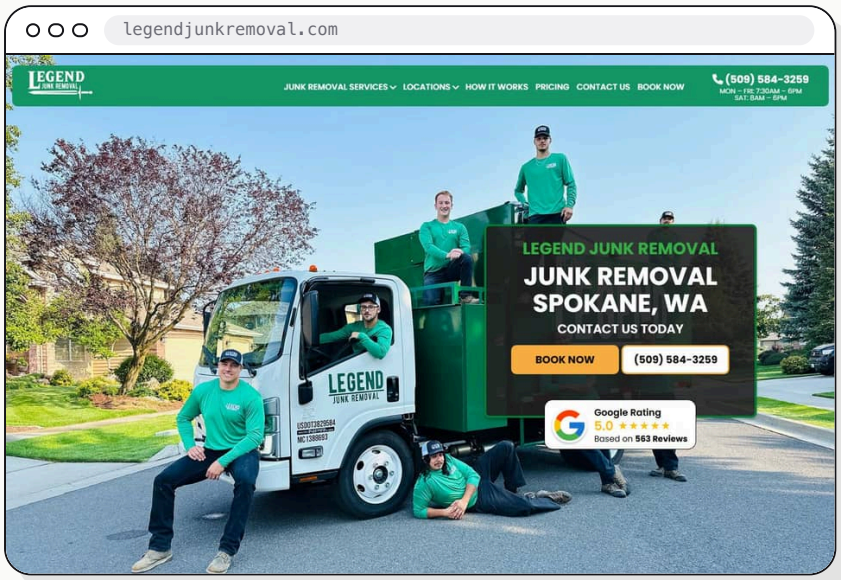

Website for a Birmingham junk removal company with a perfect 5.0 Google rating.

Alabama Junk offers full-service junk removal and dumpster rental in Birmingham, with same-day and 24/7 emergency service and a 5.0 Google rating across hundreds of reviews.

I developed the site on WordPress with a custom theme, hosted on WP Engine, structured around services, service areas, and that standout review score.

WordPress · PHP · JavaScript · CSS

Client Alabama Junk · **Services** WordPress development, Web development · `alabamajunk.com`

Junk removal website · 2025

Legend Junk Removal website

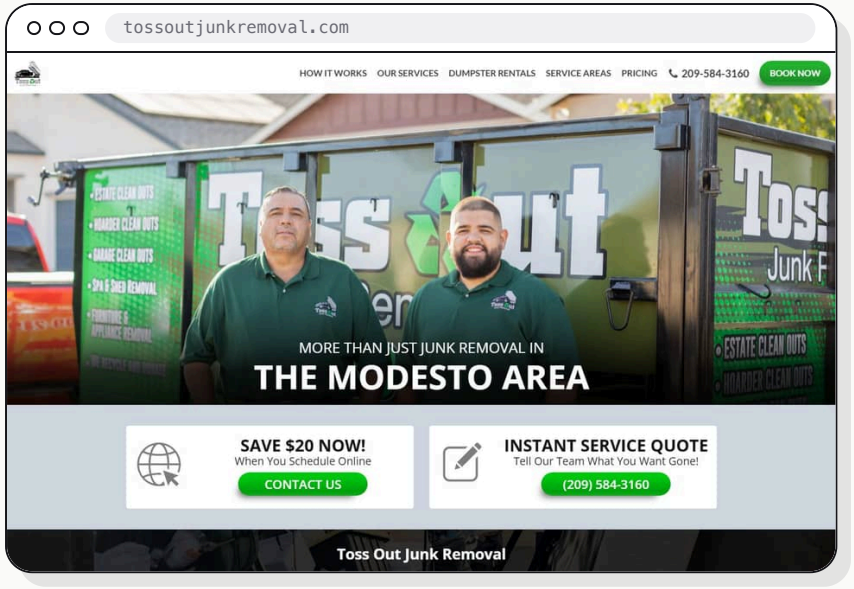

Website for a locally owned Spokane junk removal and demolition company.

Legend Junk Removal covers Spokane, Washington with furniture and appliance removal, estate cleanouts, construction debris, and demolition, offering same-day service with a donation and recycling focus.

I built the WordPress site with per-service landing pages and clear licensed-and-insured trust signals.

WordPress · PHP · JavaScript · CSS

Client Legend Junk Removal · **Services** WordPress development, Web development · `legendjunkremoval.com`

Junk removal website · 2025

Toss Out Junk Removal website

Website for a family-owned junk removal and dumpster company in Modesto, California.

Toss Out Junk Removal is family-owned and operated in the Modesto area, open seven days a week with same-day service, dumpster rentals, and estate cleanouts alongside standard hauling.

I developed the WordPress site, hosted on WP Engine, with free quotes and the seven-day availability made obvious from the first screen.

WordPress · PHP · JavaScript · CSS

Client Toss Out Junk Removal · **Services** WordPress development, Web development · tossoutjunkremoval.com

Junk removal website · 2025

970 Junk Removal website

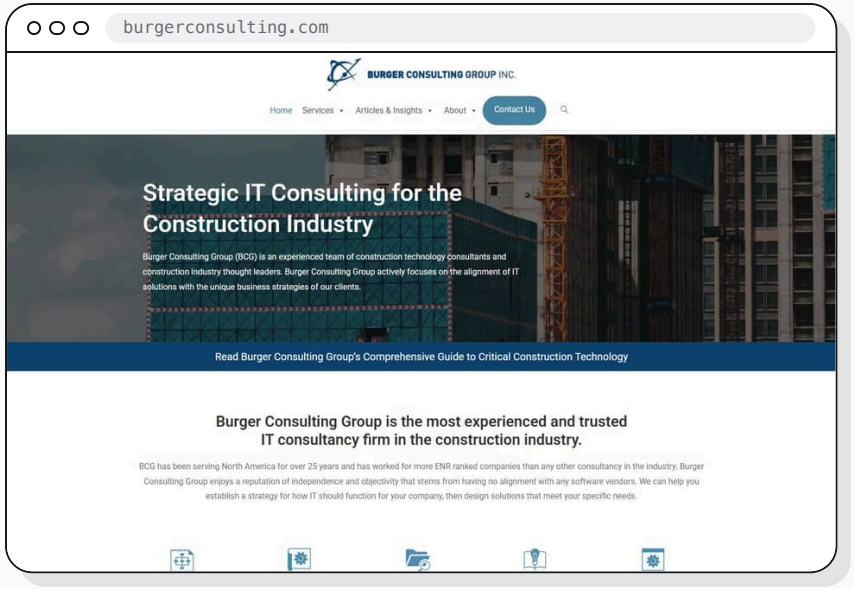

Website for a Northern Colorado junk removal company named after its area code.

970 Junk Removal serves Windsor, Fort Collins, Loveland, Greeley, and surrounding Northern Colorado towns with same-day junk removal, cleanouts, and light demolition, priced transparently.

I built the WordPress site with town-level service pages so each community the company serves can find it in local search.

WordPress · PHP · JavaScript · CSS

Client 970 Junk Removal · **Services** WordPress development, Web development · 970junk.com

Consulting firm website · 2025

Burger Consulting Group website

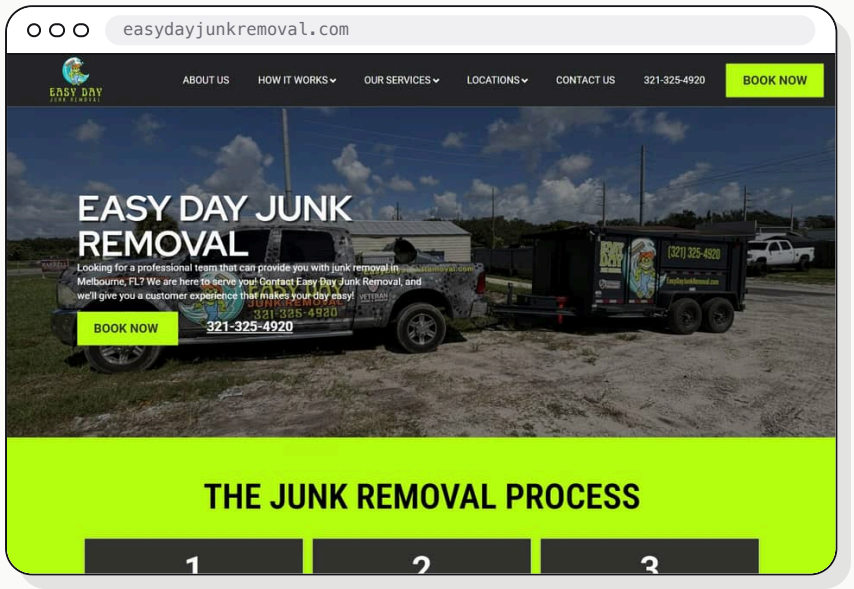

Website for a Chicago-based IT consultancy specialising in the construction industry.

Burger Consulting Group has advised construction companies on technology since 1997, offering software selection, technology assessments, fractional CIO services, and implementation project management across North America.

I worked on the WordPress site, built with Elementor, presenting a deep service catalogue and thought-leadership content to an enterprise audience.

WordPress · Elementor · PHP · CSS

Client Burger Consulting Group · **Services** WordPress development, Web development · `burgerconsulting.com`

Junk removal website · 2025

Easy Day Junk Removal website

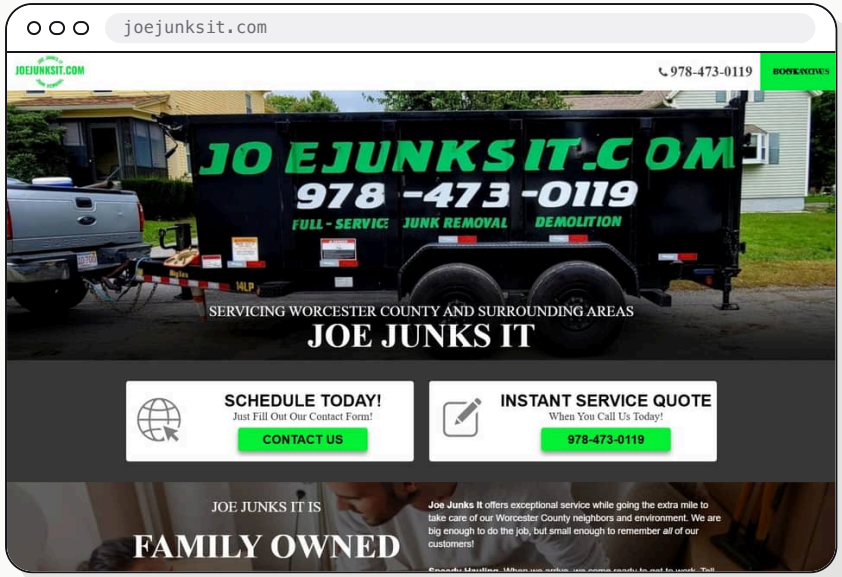

Website for a veteran-owned junk removal company on Florida's Space Coast.

Easy Day Junk Removal is a veteran-owned business serving Melbourne, Palm Bay, Cocoa Beach, Titusville, and the rest of Brevard County with same-day and next-day full-service junk removal.

I developed the site on a custom WordPress theme with online scheduling so customers can book a pickup without picking up the phone.

WordPress · PHP · JavaScript · CSS

Client Easy Day Junk Removal · **Services** WordPress development, Web development · `easydayjunkremoval.com`

Junk removal website · 2025

Joe Junks It website

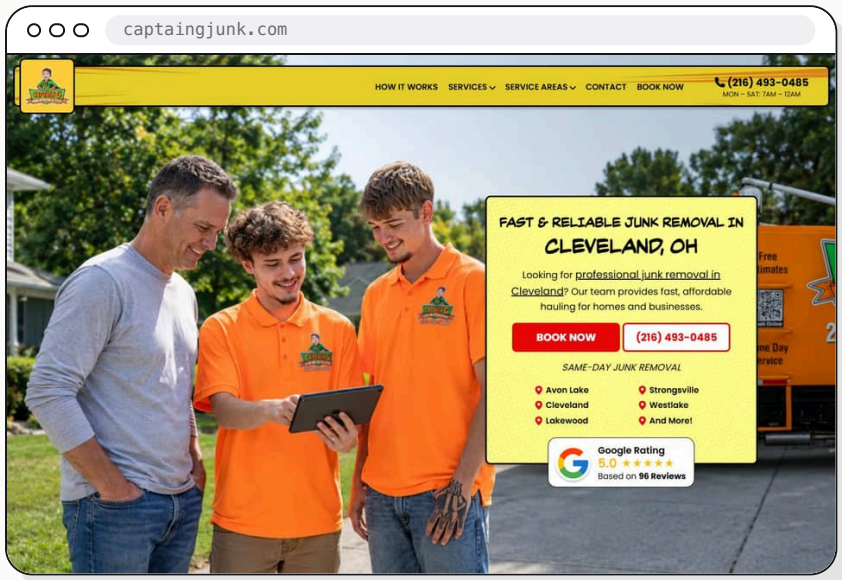

Website for a family-owned junk removal business in Worcester County, Massachusetts.

Joe Junks It is a family-owned hauler serving Worcester County, donating reusable items to people in need and recycling whatever can't be donated.

I built the site on a custom WordPress theme with straightforward service pages for furniture, appliances, yard waste, and construction debris.

WordPress · PHP · JavaScript · CSS

Client Joe Junks It · **Services** WordPress development, Web development · joejunksit.com

Junk removal website · 2025

Captain G Junk Removal website

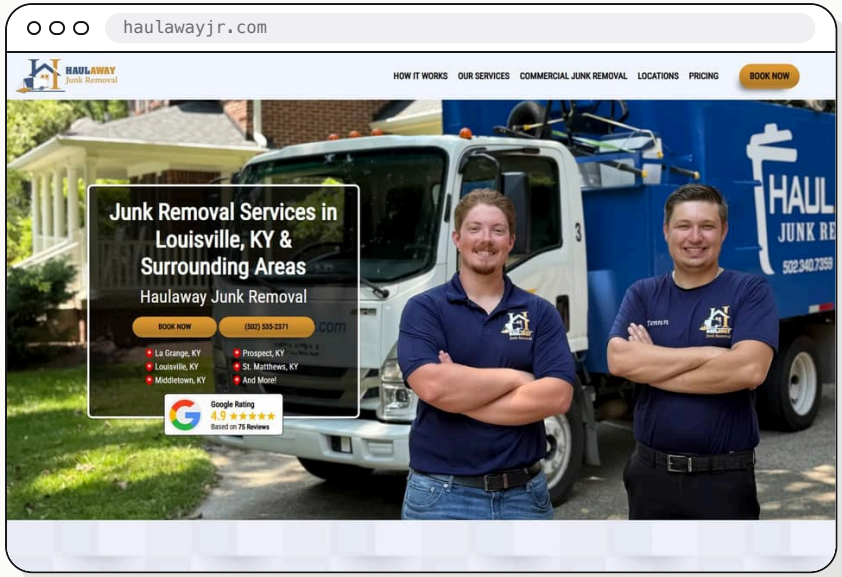

Website for a Cleveland junk removal and demolition company.

Captain G Junk Removal serves Cleveland and suburbs like Euclid, Avon Lake, and Garfield Heights with same-day junk removal, hoarding and estate cleanouts, and demolition of decks, hot tubs, and concrete.

I developed the WordPress site with service and suburb pages plus recycling and donation messaging to match how the company operates.

WordPress · PHP · JavaScript · CSS

Client Captain G Junk Removal · **Services** WordPress development, Web development · captaingjunk.com

Junk removal website · 2025

Haulaway Junk Removal website

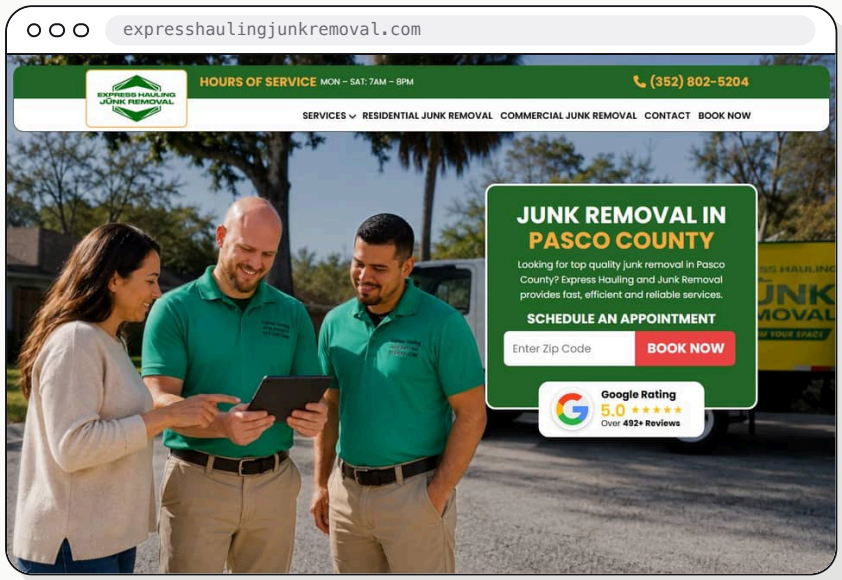

Website for a veteran-owned junk removal company in Louisville, Kentucky.

Haulaway Junk Removal is veteran-owned and locally operated in Louisville, offering same-day service, veteran discounts, and donation and recycling of hauled items from furniture to full hoarding cleanouts.

I built the WordPress site, hosted on WP Engine with WP Rocket caching, around fast quotes and the company's veteran-owned identity.

WordPress · PHP · JavaScript · CSS

Client Haulaway Junk Removal · **Services** WordPress development, Web development · haulawayjr.com

Junk removal website · 2025

Express Hauling website

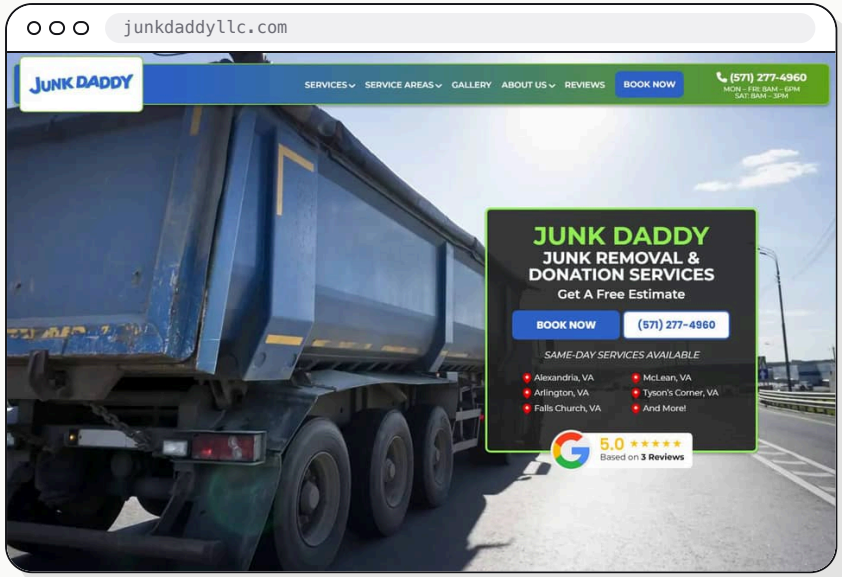

Website for a five-star junk removal company in Pasco County, Florida.

Express Hauling covers Pasco County with residential and commercial junk removal, furniture and appliance pickup, shed demolition, and hot tub removal, backed by five-star reviews.

I developed the WordPress site with same-day service messaging and a donation and recycling approach woven through the service pages.

WordPress · PHP · JavaScript · CSS

Client Express Hauling · **Services** WordPress development, Web development · expresshaulingjunkremoval.com

Junk removal website · 2025

Junk Daddy website

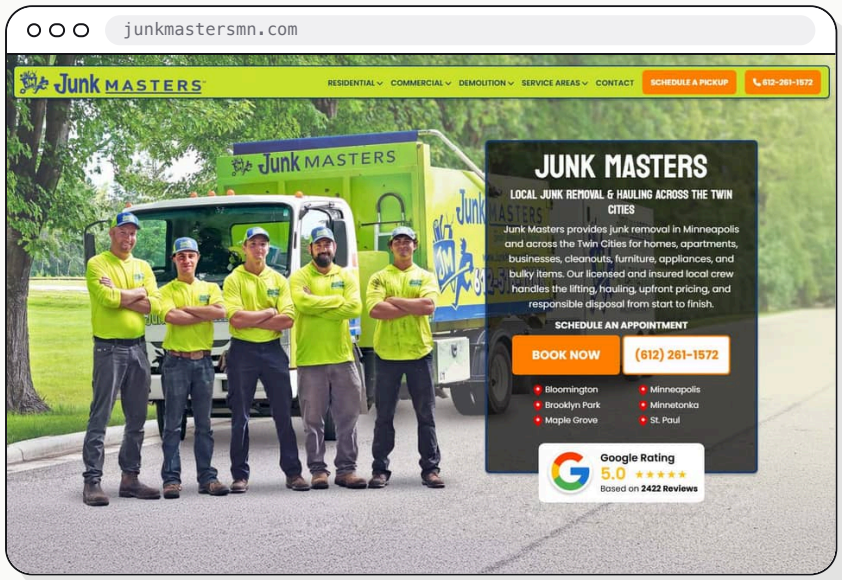

Website for a family-owned junk removal and donation pickup service in Northern Virginia.

Junk Daddy serves Alexandria, Arlington, Fairfax, and Burke with junk removal built around donation: usable items get picked up and passed on rather than dumped.

I built the WordPress site, hosted on WP Engine, with the donation-first story leading and free same-day estimates as the primary call to action.

WordPress · PHP · JavaScript · CSS

Client Junk Daddy · **Services** WordPress development, Web development · junkdaddyllc.com

Junk removal website · 2025

Junk Masters website

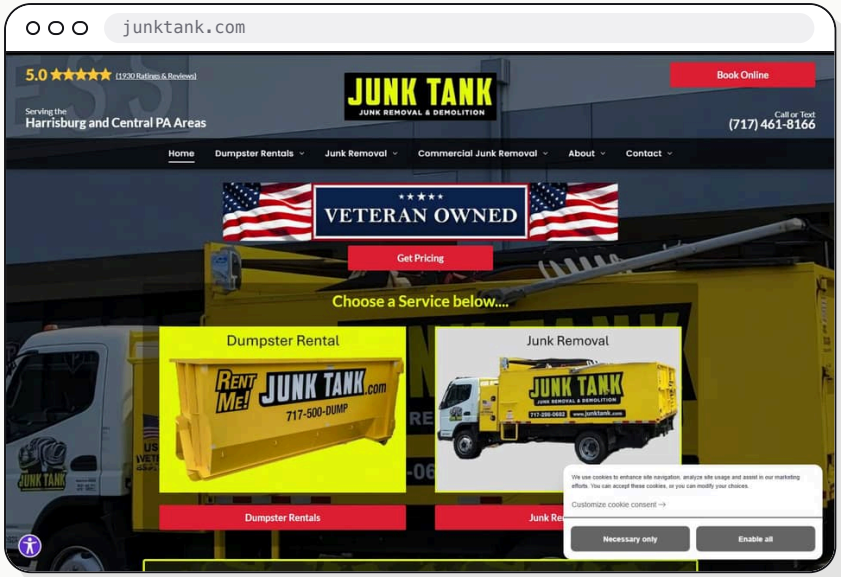

Website for a Twin Cities junk removal company with niche cleanout services.

Junk Masters is a locally owned Minneapolis hauler covering the Twin Cities with same-day junk removal, estate and apartment cleanouts, and unusual jobs most companies skip, like bed bug, boat, and car removal.

I developed the WordPress site to organise that wide service range into a clear structure with donation and recycling messaging throughout.

WordPress · PHP · JavaScript · CSS

Client Junk Masters · **Services** WordPress development, Web development · junkmastersmn.com

Junk removal website · 2025

Junk Tank website

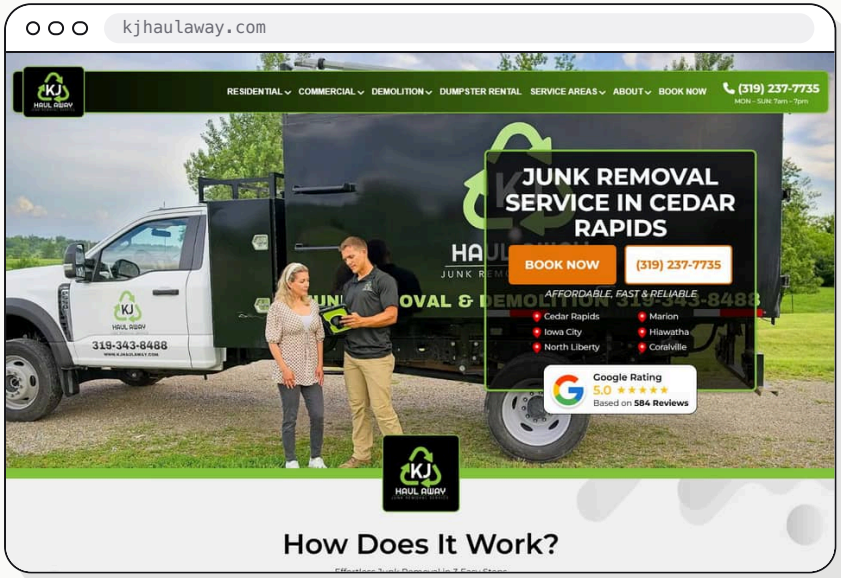

Website for a Central Pennsylvania junk removal and dumpster rental company.

Junk Tank serves Harrisburg, Hershey, and Central PA with junk removal and dumpster rentals, offering same-day options, a veteran discount, and donations to local non-profits.

The site runs on the Duda platform with both sides of the business, hauling and dumpsters, given equal weight in the navigation and calls to action.

Duda · JavaScript · CSS

Client Junk Tank · **Services** Web development · junktank.com

Junk removal website · 2025

KJ Haul Away website

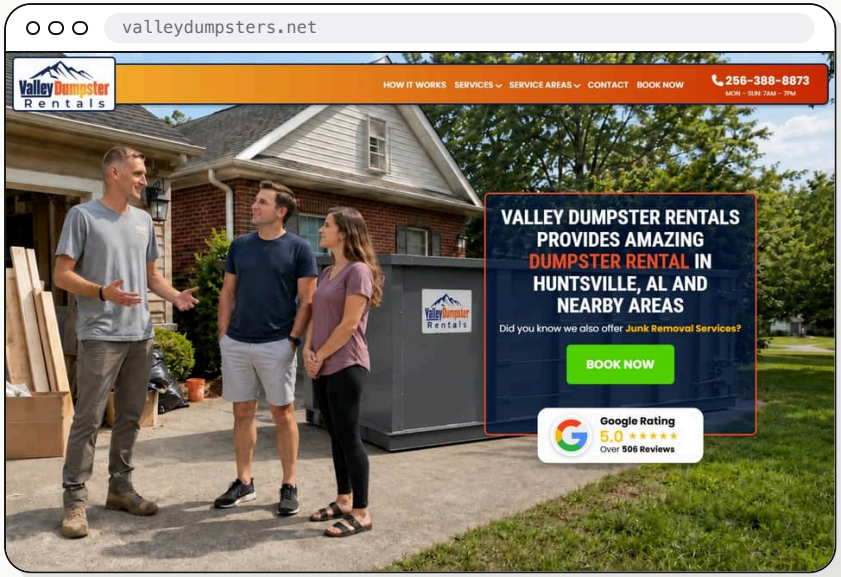

Website for a veteran-owned junk removal service in Cedar Rapids, Iowa.

KJ Haul Away is veteran-owned and operated in Cedar Rapids and Hiawatha, Iowa, with same-day and next-day pickup and donations to local charities where items can be reused.

I built the WordPress site with Elementor, covering furniture, appliance, yard waste, hot tub, and construction debris removal.

WordPress · Elementor · PHP · CSS

Client KJ Haul Away · **Services** WordPress development, Web development · kjhaulaway.com

Dumpster rental website · 2025

Valley Dumpster Rentals website

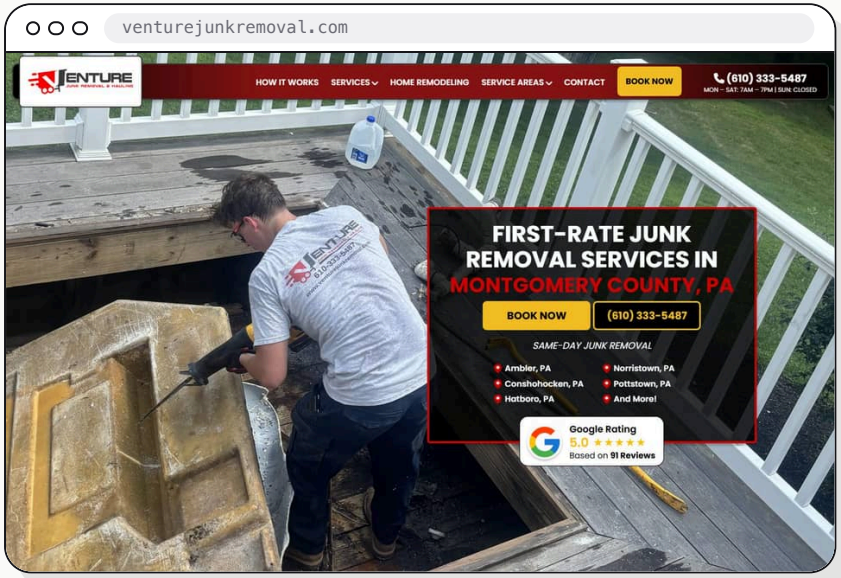

Website for a veteran-owned dumpster rental company in Huntsville, Alabama.

Valley Dumpster Rentals is veteran-owned with over 500 five-star Google reviews, renting 15 and 20 cubic yard dumpsters across Huntsville with transparent flat pricing and same-day service.

I developed the WordPress site around simple size selection and flat pricing so customers can choose a dumpster without a phone call.

WordPress · PHP · JavaScript · CSS

Client Valley Dumpster Rentals · **Services** WordPress development, Web development · `valleydumpsters.net`

Junk removal website · 2025

Venture Junk Removal website

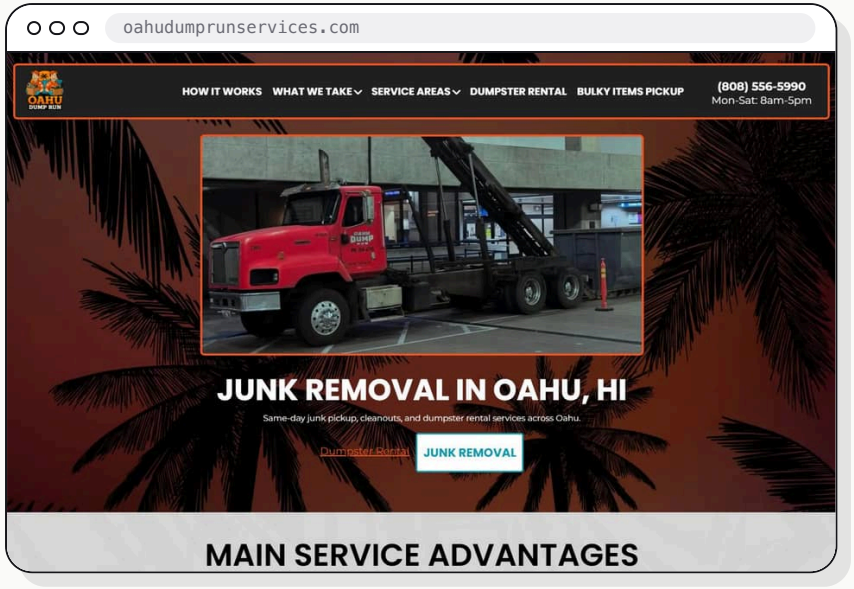

Website for a junk removal and light demolition company in Montgomery County, Pennsylvania.

Venture Junk Removal & Hauling offers same-day and next-day service across Montgomery County, PA, from property and estate cleanouts to light and interior demolition.

I built the WordPress site with residential and commercial paths and a donation and recycling angle to reduce landfill waste.

WordPress · PHP · JavaScript · CSS

Client Venture Junk Removal & Hauling · **Services** WordPress development, Web development · `venturejunkremoval.com`

Junk removal website · 2025

Oahu Dump Run Services website

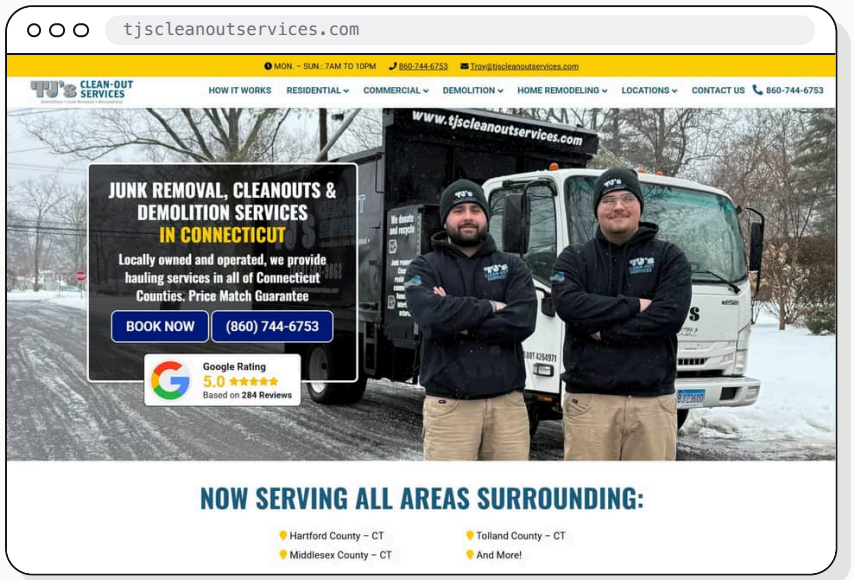

Website for an island-wide junk removal service on Oahu, Hawaii.

Oahu Dump Run Services offers same-day junk removal island-wide, with dumpster rental, cleanouts, and light demolition alongside, and cites over 800 five-star reviews.

I developed the WordPress site with service pages tuned for island-wide coverage and the review count doing the persuading.

WordPress · PHP · JavaScript · CSS

Client Oahu Dump Run Services · **Services** WordPress development, Web development · oahudumprunservices.com

Junk removal website · 2025

TJ's Cleanouts website

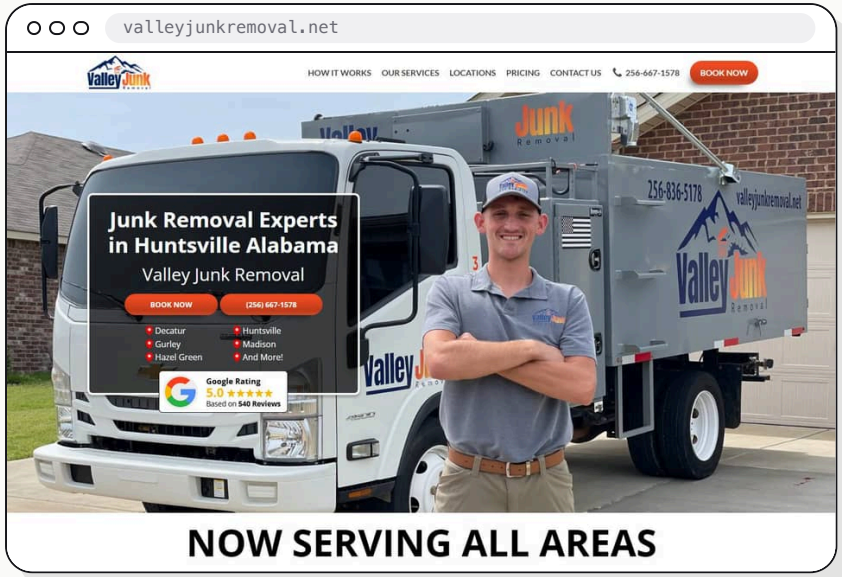

Website for a family-owned cleanout and demolition company in Hartford County, Connecticut.

TJ's Cleanouts handles junk removal, residential and commercial cleanouts, and demolition across Hartford County, family-owned and licensed with same-day service.

I built the WordPress site with a service structure covering everything from single-item pickups to full property cleanouts.

WordPress · PHP · JavaScript · CSS

Client TJ's Cleanouts · **Services** WordPress development, Web development · tjscleanoutservices.com

Junk removal website · 2025

Valley Junk Removal website

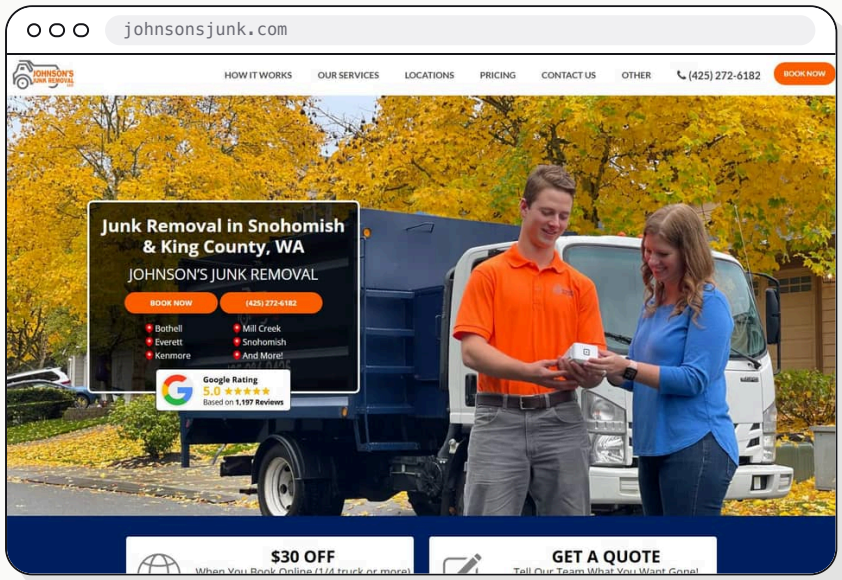

Website for a Huntsville junk removal company with 540+ five-star reviews.

Valley Junk Removal serves Huntsville, Madison, and Decatur, Alabama with same-day pickup, volume-based transparent pricing, and discounts for veterans and first responders.

I developed the WordPress site with clear pricing explanations and review-led social proof, plus pages for light demolition and property management work.

WordPress · PHP · JavaScript · CSS

Client Valley Junk Removal · **Services** WordPress development, Web development · valleyjunkremoval.net

Junk removal website · 2025

Johnson's Junk Removal website

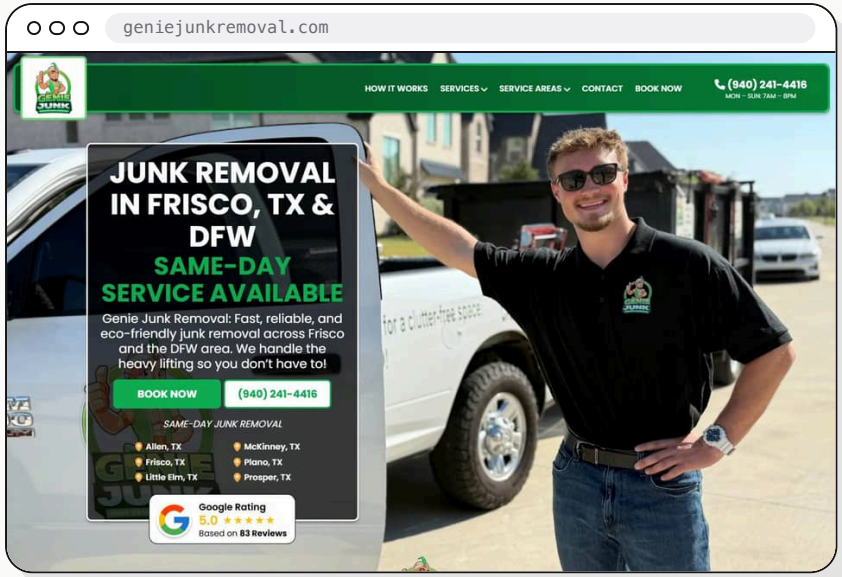

Website for a Washington junk removal company that recycles about 90% of every load.

Johnson's Junk Removal, owned by Jack Johnson, serves Snohomish and King County with same-day pickup, recycles around 90% of what it hauls, and holds a 5.0 Google rating across roughly 1,200 reviews.

I built the WordPress site to put those numbers front and centre, with service and county pages supporting local search.

WordPress · PHP · JavaScript · CSS

Client Johnson's Junk Removal · **Services** WordPress development, Web development · johnsonsjunk.com

Junk removal website · 2025

Genie Junk Removal website

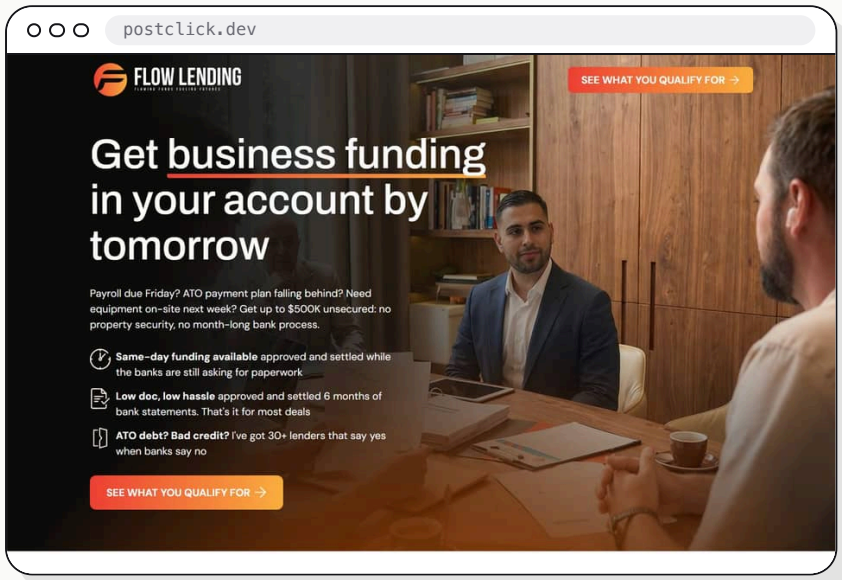

Website for a junk removal company serving Frisco and the DFW metro area.

Genie Junk Removal covers Frisco and the wider Dallas-Fort Worth metro with same-day service, donating gently used furniture and appliances to local charities and recycling responsibly.

I developed the WordPress site with a $20-off promotion, free estimates, and service pages from residential pickups to hoarding cleanup.

WordPress · PHP · JavaScript · CSS

Client Genie Junk Removal · **Services** WordPress development, Web development · geniejunkremoval.com

Finance broker website · 2025

Flow Lending website

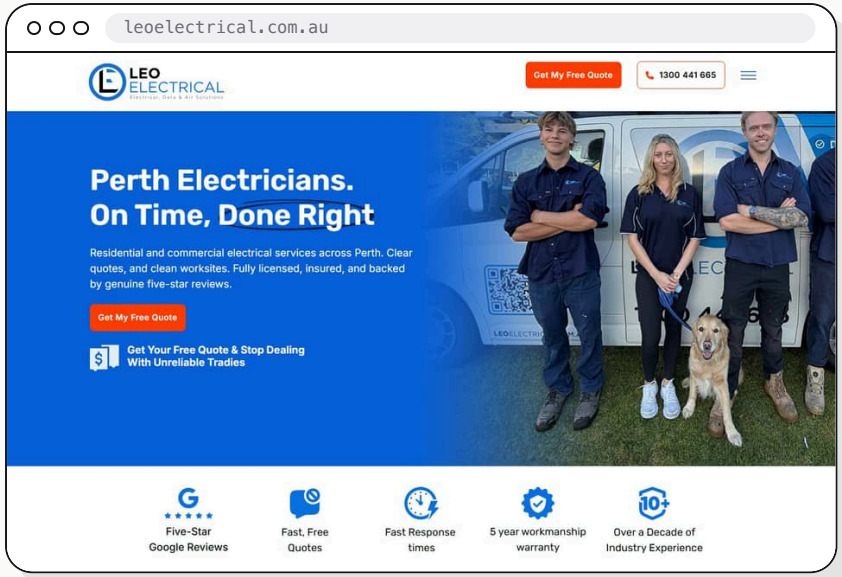

Website for an Australian business finance broker offering next-day funding.

Flow Lending is a founder-led Australian finance broker with access to more than 30 lenders, arranging unsecured business loans, equipment and vehicle finance, and lines of credit, with funding often landing the next day. The positioning is personal: meet your broker, not a call centre.

I built the site on WordPress with the Bricks builder, pairing product pages for each finance type with fast application calls to action.

WordPress · Bricks Builder · PHP · CSS

Client Flow Lending · **Services** WordPress development, Web development · postclick.dev

Electrician website · 2025

Leo Electrical website

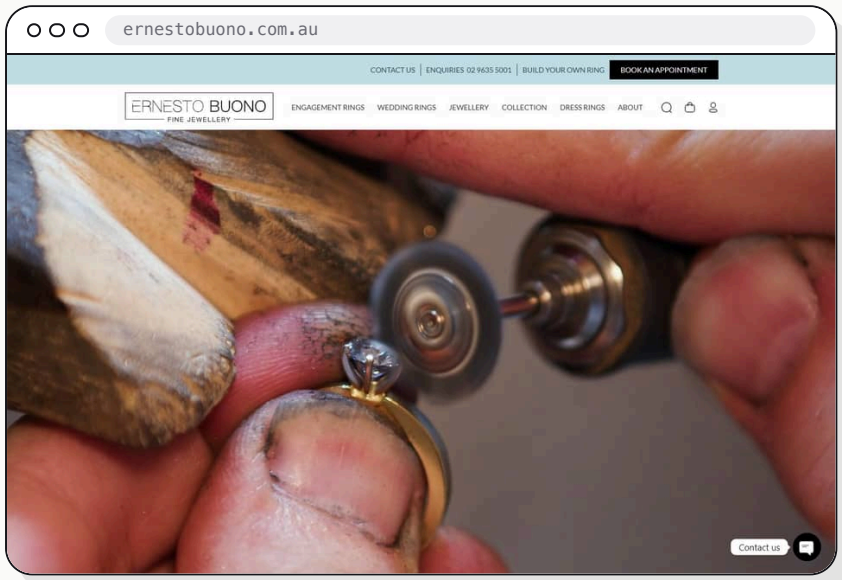

Website for a licensed Perth electrical contractor with a 5-year workmanship warranty.

Leo Electrical serves Perth north of the river with residential and commercial electrical work, switchboard upgrades, EV charger installation, and lighting design, backed by a 5-year workmanship warranty and five-star reviews.

I built the WordPress site with the Bricks builder, structured around service pages and same-day response messaging for emergency work.

WordPress · Bricks Builder · PHP · CSS

Client Leo Electrical · **Services** WordPress development, Web development · leoelectrical.com.au

Online store · 2025

Ernesto Buono Fine Jewellery website

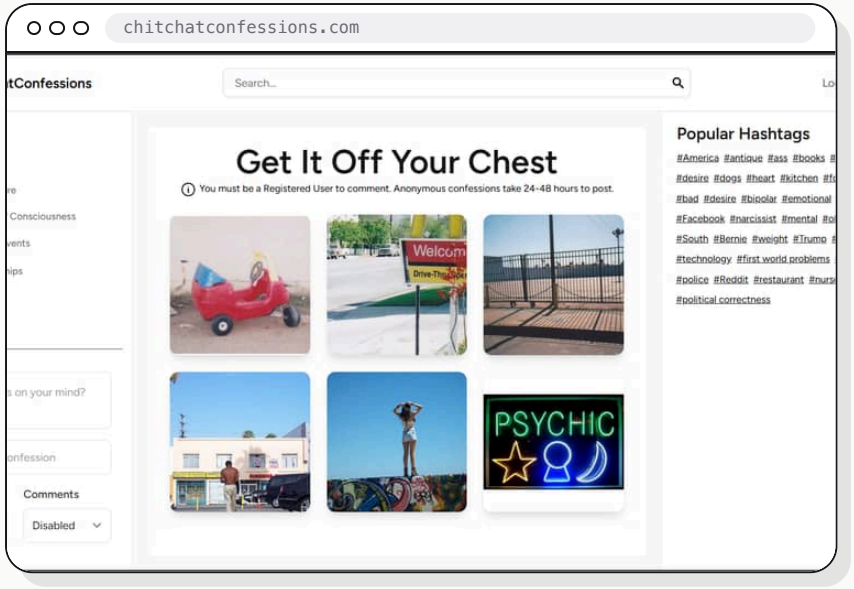

Online store for a Sydney atelier crafting engagement rings and fine jewellery.

Ernesto Buono is a Sydney jewellery atelier led by its namesake master jeweller, selling engagement rings, wedding rings, and custom pieces in both natural and lab-grown diamonds.

I worked on the WordPress store, built with Elementor and tuned with WP Rocket caching, where a video-led homepage and clean product browsing carry the brand's craftsmanship online.

WordPress · Elementor · PHP · CSS

Client Ernesto Buono Fine Jewellery · **Services** E-commerce development, WordPress development · ernestobuono.com.au

Platform rebuild · 2024

Chitchat platform migration

Full platform rebuild and migration to a modern stack, without disrupting the existing community.

Chitchat had an active community on an aging platform that was getting harder to maintain and slower to load. The goal was a clean rebuild on a modern stack while keeping everything the community relied on.

I handled the migration end to end: rebuilding pages and features, moving content across, and launching with no downtime for users.

Next.js · React · TypeScript · Tailwind CSS

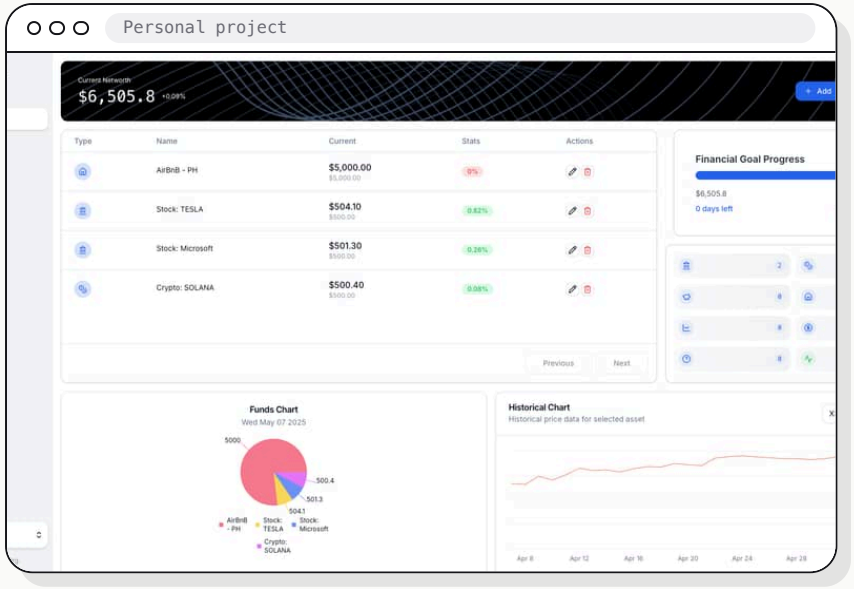

Client Chitchat Confessions · **Services** Platform migration, Web development · `chitchatconfessions.com`

03 / 03

Personal 1

1 project I built for myself.

Trackfunds investment tracker 60

Design & build · 2024

Trackfunds investment tracker

A personal project: an investment tracking app designed and built from scratch.

Trackfunds started as a personal need: one place to see how investments are performing without spreadsheets. I designed and built it from the first wireframe to a working product.

The project covers the full stack: interface design, data modelling, and the charts and summaries that turn raw numbers into something you can act on.

Next.js · TypeScript · Tailwind CSS · PostgreSQL

Client Personal project · **Services** Product design, Web development
